CONU16

CABLE CONDUIT UL APPROVED

Diameter	16

Description: For flexible and safe protection of cables installed between the door or swing frame and the enclosure's interior. Highly flexible and halogen free.

Material: Polyamide. UL approved.

Mounting requirement: Add CONH for direct mounting to profiles.

Pack quantity: 25 m.

The cable conduit allows for fast installation of cables while guaranteeing safe and reliable connection between components installed in mobile parts and those in the enclosure. The UL certification means no additional testing is required for panels that go into the US.
