Empowering Success

Keene is a part of Canlyte, a company committed to empowering the success of its customers through local, trusted lighting specialists, resources and solutions.

Everything you would expect from a high performance floodlight...

...times

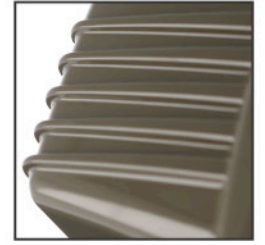

Multiple optics can achieve a variety of distributions on site to control light distribution and cut-off direction

Hardware is stainless steel to resist corrosion and screws are captive to prevent loss during relamping or maintenance

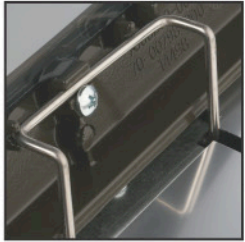

Flush, silicone mounted lens prevents water pooling on the luminaire

Integral cast fins provide a contemporary, unifying PentaFlood look and maximum heat dissipation

Durable silicone gasketing keeps out moisture and dust protecting internal components while maintaining a high level of performance

Lens frame is hinged to make access easy and leave both hands free for maintenance

Handy degree scale is integral to the mounting hardware to help with aiming.

Mounting hardware has been engineered for ease of installation and to provide maximum flexibility. PentaFlood features four options to choose from: Arm, Yoke, Tenon and Wall for various floodlight applications

Choose the PentaFlood that is right sized to complement your next outdoor lighting application:
