Analog Output Modules EP-4164, EP-4264

GFK-2961A

December 2015

GE provides RSTi-EP analog output modules with up to 4 analog outputs at +/-10 V, +/-5 V, 0-10 V, 0-5 V, 2-10 V, 1-5 V, 0-20 mA or 4-20 mA. The resolution is 16 bit per channel. An output can be connected to each connector, the internal switching is carried out automatically. The output range is defined using parameterization. A status LED is assigned to each channel. The outputs are supplied with power from the output current path (I_{OUT}).

The EP-4264 module provides individual channel diagnosis with channel related error messages.

Each module features a type plate, which includes identification information, the key technical specifications, and a block diagram. In addition, a QR code allows for direct online access to the associated documentation. The software for reading the QR code must support inverted QR codes.

Markers are available as accessories for labelling equipment. Each I/O module can be labelled using the markers to ensure clear identification when replacing individual modules or electronic units.

The RSTi-EP station is usually installed on a horizontally positioned DIN rail. Installation on vertically positioned DIN rails is also possible.

The outputs as well as the sense-lines of the AO modules must not be used as power outputs.

Modules should to be allowed to de-energize for a minimum 10 seconds after power down, prior to starting any maintenance activity.

Refer to the *RSTi-EP Slice I/O User Manual* (GFK-2958) for additional information. Refer to the *RSTi-EP Power Supply Reference Guide*, a software utility available on PME V9.00, for detailed power-feed requirements.

Module Features

- Control up to four analog outputs
- Module diagnosis
- Spring style technology for ease of wiring
- DIN rail mounted
- Double-click installation for positive indication of correct installation
- Supports indirect firmware update through the network monitor
- Supports hot insertion and extraction

Ordering Information

| Module | Description |
|---------|--|
| EP-4164 | Analog Output, 4 Channels Voltage/Current 16 Bits 2, 3, or 4-Wire |
| EP-4264 | Analog Output, 4 Channels Voltage/Current 16 Bits with Diagnostics 2, 3, or 4-Wire |

Specifications

| | EP-4164 | EP-4264 | | | |
|--|---|------------|--|--|--|
| System Data | | | | | |
| Data | Process, parameter, and diagnostic data depend on the network adapter used. | | | | |
| Interface | RSTi-EP system bus | | | | |
| System bus transfer rate | 48 Mbps | | | | |
| Potential isolation | Channel/system bus = yes | | | | |
| | Channel/channel = no | | | | |
| Outputs | | | | | |
| Number | | 4 | | | |
| Output levels | 1. Voltage (0 – 5 V, ±5 V, 0 – 10 V, ±10 V, 1 – 5 V, 2 – 10 V) 2. Current (0 – 20 mA, 4 – 20 mA) | | | | |
| Response time | 1 ms for | 4 channels | | | |
| Resolution | 16 bits | | | | |
| Accuracy | 0.1 % FSR max., 0.05 % FSR typ. | | | | |
| Temperature coefficient | 20 ppm voltage / 31 ppm current measurement / K | | | | |
| Max. error between T_{min} and T_{max} | ±220 ppm FSR | | | | |
| Monotony | Yes | | | | |
| Crosstalk between the channels | ±0.001 % FSR max. | | | | |
| Repeat accuracy | < ±1 mV eff. | | | | |
| Output ripple | max. 0.001 % | | | | |
| Voltage load resistance | \geq 1 k Ω (at > 50°C (122 °F) max ambient temperature, | | | | |
| | total sensor current of 10 mA per channel but 25 mA per module) | | | | |
| Current load resistance | \leq 600 Ω including field cable resistance | | | | |
| Actuator connection | 2-wire (current and voltage; automatic detection), 4-wire (voltage) | | | | |
| Short-circuit-proof | Yes | | | | |
| Module diagnosis | Yes | | | | |
| Individual channel diagnosis | No | Yes | | | |
| Substitute value | Yes | | | | |
| Can be used with EP-19xx module | Yes | | | | |
| Supply | | | | | |
| Supply voltage | 20.4V – 28.8V | | | | |
| Current consumption from system current path Isys | 8 mA | | | | |
| Current consumption from output current path lout | 85 mA | | | | |
