

# Canopy Kits

Rize offers a range of Canopy Kits that are available in both feed and non feed versions. Rize Canopy Kits are supplied with all the parts needed to hang your fixture, from the canopy to the cable and Kwik Grip. These can be supplied with different lengths of cable and different types of Kwik Grips, some of which you will find here. Coiled cable is also available upon request.

## Non Feed Kits

Non feed kits are not supplied with power cables and do not need to be attached to the junction box. The canopy cover will only have one hole in it to attach the cable coupler.

## Feed Kits

Feed kits are normally mounted to the junction box and are supplied with a SJT cord that will come through the canopy. They are also supplied with a strain relief bushing and a two piece cable coupler.

# Accessories

## Wire Rope Cutter

When cutting cable it is important to use a recognized wire rope cutter such as the Rize cutter detailed here. This will ensure that the form of the rope is maintained prior to insertion in the Kwik-Loc.

- Storage catch
- RWC4 Cable cutting capacity
- Spring loaded
- 5" long handles
- Hardened steel blades
- Vinyl coated handles
- Cable Cutter for RWC8 Cable also available

Ordering Information			
Item #	Code	Description	Qty
30340	RDTWRC	Wire Rope Cutter	1 pc

## Cable Counter Lid

An easy solution for the contractor to measure the cable to length. The lid fits on a standard five-gallon bucket, which can be used to easily transport cable, tools and Kwik-Locs on the job site.

Ordering Information			
Item #	Code	Description	Qty
30390	RCDL	Lid Style English Cable Counter	1pc

## Eye Bolt & Nut

A simple way to provide an anchor point is by using an eye bolt and nut. The eye bolt has a 3/4 in. inside diameter ring to make wire rope attachment easy. Weight limit of 400 lbs.
