## Model RXT Automatic Transfer Switch

The Model RXT automatic transfer switch is designed for use only with Kohler® generator sets equipped with RDC2 or DC2 generator set/transfer switch controls. The transfer switch operation is controlled by the RDC2/DC2 integrated generator set/transfer switch controller.

## Standard Features

- Allows utility voltage display on the RDC2/DC2 integrated generator set/transfer switch controller, available exclusively on Kohler® residential and light commercial generator sets
- Interface board for connection to the Model RDC2 or DC2 generator set/transfer switch controller (mounted on generator set models listed above)
- UL listed
- Models with load centers, UL 67 listed, file \#E251086
- Models without load centers, UL 1008 listed, file \#E58962
- CSA certification, file \#LR58301, is available for:
- Standard ATS without load center (single and three-phase)
- Service entrance ATS 100, 150, and 200 amp models
- Corrosion-resistant NEMA 3R aluminum enclosure
- Padlockable
- Approved for indoor or outdoor installation
- ANSI 49 gray
- NEMA 1 enclosure available on 100 amp load center models
- Contactor electrically and mechanically interlocked
- Double throw inherently interlocked design
- Contactor manually operable for maintenance purposes
- Silver alloy main contacts
- Transfer switches are $100 \%$ equipment rated and can be applied at the rated current without derating (non-service entrance models)
- Service entrance models include disconnect circuit breaker on the utility (normal) source side ( $80 \%$ rated)
- Five-year limited warranty

## Available Models

- 100,200 , and 400 amp standard and service entrance models are available.
- 150 and 300 amp service entrance models are also available.
- 100 amp standard single-phase models are available with or without a 16-space load center. Up to 8 tandem breakers can be used for a total of 24 circuits.
- 100 Amp standard single phase model with a 12 -space load center and a NEMA 1 enclosure is available as a standalone non-configurable spec (GM85273-SA_).
- See page 6 for more information.

## Optional Accessories

The following optional accessories are available:

## Status indicator kit

- LED indicators for source availability and contactor position
- Mounts on the outside of the RXT enclosure
- Dimensions: $92 \mathrm{~mm} \times 42 \mathrm{~mm}$ (3.62 in. $\times 1.65 \mathrm{in}$.)
- View transfer switch status without removing enclosure cover
- An overhang on the enclosure protects the indicator panel and ribbon cable opening
- For more information on the status indicator kit, see specification sheet G11-123

## Load shed kit

- Automatically sheds non-critical loads when essential appliances are running
- Prevents generator overload in compliance with NEC 2008
- Provides two (2) HVAC relays, rated 10 A @ 125 VAC, to control two independent air conditioner loads
- Includes four (4) pilot relays rated 120VAC, 125VA (pilot duty), 10 A @ 125 VAC (general purpose) to control customer-provided power relays for non-essential loads
- Mounts inside the ATS enclosure
- Uses Kohler's exclusive RBUS communication protocol
- Requires Kohler ${ }^{\oplus}$ residential generator set with RDC2 or DC2 controller
- For more information on the load shed kit, see specification sheet G11-124

## Codes and Standards

The ATS meets or exceeds the requirements of the following specifications:

- Underwriters Laboratories UL 67, Enclosed Panel Boards (load center models) file \#E251086
- Underwriters Laboratories UL 1008, Standard for Automatic Transfer Switches for Use in Emergency Systems, file \# E58962
- Underwriters Laboratories UL 508, Standard for Industrial Control Equipment
- CSA certification available, file \#LR58301 (not available for 300-400 amp service entrance or 100 amp load center models). Must be selected when the transfer switch is ordered.
- NFPA 70, National Electrical Code
- NFPA 110, Emergency and Standby Power Systems
- NEMA Standard IC10-1993, AC Automatic Transfer Switches

## Specifications

| Interface Module Specifications |  |
| :---: | :---: |
| Load Control Contact Rating | 10 A @ 250 VAC |

Note: Data is subject to change. Refer to the transfer switch dimension drawings and wiring diagrams for planning and installation.

## Withstand and Close-On Ratings (WCR)

## Service Entrance Transfer Switch Ratings

The service entrance transfer switch is factory-equipped with a normal source disconnect circuit breaker.
Suitable for control of motors, electric discharge lamps, tungsten filament lamps and electric heating equipment where the sum of motor full-load ampere ratings and the ampere ratings of other loads do not exceed the ampere rating of the switch and the tungsten load does not exceed 30 percent of switch rating.

| Switch Rating, Amps * | WCR, RMS Symmetrical Amps at 240 VAC |
| :---: | :---: |
| $100,150,200$ | 22,000 |
| 300,400 | 35,000 |
| * Continuous load current not to exceed $80 \%$ of switch rating. |  |

## Contactor Ratings with Coordinated Circuit Breakers

Single-phase transfer switches are UL listed at 240 VAC maximum. Three-phase transfer switches are rated at 480 VAC maximum. The following table lists contactor withstand current ratings (WCR) for 100-400 ampere non-service entrance rated switches with specific manufacturer's circuit breakers per UL and Canadian safety standards. Suitable for control of motors, electric discharge lamps, tungsten filament lamps and electric heating equipment where the sum of motor full-load ampere ratings and the ampere ratings of other loads do not exceed the ampere rating of the switch and the tungsten load does not exceed 30 percent of switch rating.

The transfer switch is rated for use on a circuit capable of delivering not more than the RMS symmetrical amperes maximum as shown in the tables below, but no greater than the interrupting capacity of the selected breaker.

| WCR Ratings with Specific Manufacturer's Molded-Case Circuit Breakers |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Switch Rating, Amps | Voltage, max. | Number of Poles/ Phases | WCR, RMS Symmetrical Amps | Manufacturer | Type or Class | Maximum <br> Size, Amps |

## Model Designation

Record the transfer switch model designation in the boxes. The transfer switch model designation defines ratings and characteristics as explained below.

## Sample Model Designation: RXT-JFNC-0200A

## Model

RXT: Kohler Automatic Transfer Switch Controls
J: Interface for RDC2/DC2 Controller Voltage/Frequency
C: 208 Volts/ 60 Hz (3-phase only)
F: $\quad 240$ Volts/ 60 Hz
M: $\quad 480$ Volts $/ 60 \mathrm{~Hz}$ (3-phase only)

## Number of Poles/Wires

N: 2-pole, 3-wire, solid neutral (120/240 V only)
T: 3-pole, 4-wire, solid neutral
V : 4-pole, 4-wire, switched neutral

## Enclosure

A: NEMA 1 *
C: NEMA 3R

* NEMA 1 enclosure is available on 100 amp load center models only.

## Current Rating

0100: 100 amps
0150: 150 amps
0200: 200 amps
0300: 300 amps
0400: 400 amps

## Connections

A: No load center
B: With load center (100 amp single-phase only)
ASE: Service entrance rated
CSE: Service entrance rated with CSA certification (100/150/200 amps only)

## Available Models

All Model RXT transfer switches are standard-transition 60 Hz automatic transfer switches. Letters in parentheses refer to the model designation code described above.

| Amps | Description (Connections) | Voltages |  |  | Poles | Phases | WCR § <br> RMS Symmetrical Amps |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
