

## LEDTASK EZ RIBBON CONNECTOR

Connecting a GM Lighting standard or high output flexible linear ribbon has never been easier. With the LEDTask EZ Ribbon Connector, you simply open, insert and snap closed. The connector itself captures the ribbon snugly and once in place, snaps closed for a secure connection.

Whether you are connecting two ribbons together, or connecting a ribbon to a GM Lighting power supply, the LEDTask EZ Ribbon Connector is the quickest and easiest solution.

LTC-EZ-1

LTW-EZ-6

- Cut ribbon in field and connect in seconds
- Enables easier installation on multiple lengths
- Connect the same way to power supply - securely and in seconds
- Do not use with wet location, RGB or SLR ribbons
