

# Nuheat Controls

## Programmable Thermostats

### SIGNATURE Thermostat — WiFi-Enabled Floor Heating Thermostat

The Nuheat SIGNATURE thermostat is North America's first WiFi-enabled thermostat designed specifically for electric floor heating systems. Homeowners can monitor, control, and program their Nuheat floor heating system via the free Nuheat SIGNATURE

smartphone app (iOS and Android) or any web browser. Homeowners can access a super-intuitive user interface using the 3.5" color touchscreen display. The thermostat also provides homeowners with useful information such as energy usage as well as

weather updates. The Nuheat SIGNATURE thermostat features 7-day programmability, dual voltage compatibility (120V & 240V), and built-in Class A GFCI protection. The exclusive design features a high-gloss frame and a borderless clear acrylic which blends into any modern room décor.

### SIGNATURE Benefits:

- Programmable WiFi-enabled floor heating thermostat
- Control thermostat via iOS/Android devices and MyNuheat.com
- Displays current and forecasted weather information
- 3.5" color touchscreen
- Energy use monitor
- Floor sensing and ambient air sensing
- 7-day programmability
- Suitable for tile, stone and laminate/engineered wood floors
- Dual voltage compatibility (120V or 240V)
- Built-in G.F.C.I. (Class A)
- Manufacturer's limited three (3) year warranty

### 120 & 240 Volt Specifications

Model: SIGNATURE  
 Supply: 120V/240V, 50/60 Hz  
 Load: 15 A max. (resistive load)  
 Power: 1800W @ 120V  
 3600W @ 240V  
 GFCI: Class A ( 5 mA TRIP LEVEL)  
 Approvals: UL C/US
