Label Printer

EZCODE®
PROFESSIONAL LABELING SYSTEM

NEW!

EZL500 Thermal Label Printer

The industry's most sophisticated label printer is also the easiest to use. It's so smart, it's simple!

- Large LCD screen makes viewing easy

- Powerful firmware is easy to use and update

- Ergonomic design makes it easy to carry

- Thermal transfer technology enables you to print non-smearing labels

- Cut a label with just the touch of a button

- Large tape cassette maximizes the amount of tape media

- Wide output port makes it easy to collect your printed labels

- Backlit display enables use in low-light environments

- Oversized keys and spacing make it easy to type labels

- Integral cassette sensor automatically adjusts the unit to your tapes width and media type, eliminating reprogramming with each tape switch

- Can be outfitted with a long-life, rechargeable, 7.4 volt Li-ion battery

With the EZCODE® EZL500 thermal label printer, you can print the widest variety of labels used on the most surface types – and you can use it in more work environments than any other thermal label printer on the market. Best of all, it's easier to use than any other thermal label printer. With the EZL500 printer, you'll be labeling cable jackets and other surfaces in no time at all!

It's easy to get a handle on things

The printer's simple-to use but powerful firmware makes operation intuitive, so you won't spend valuable time reading the instruction manual. The ergonomically designed EZL500 printer fits a firm grip and helps to protect the unit in case of an accidental drop. The EZL500 printer features the largest backlit LCD screen among all handheld thermal labels printers. It enables you to easily see information on display and is especially useful in low-light conditions.

Just print, cut and stick

Using thermal transfer technology, the EZL500 unit prints labels that won't smear. Based on average usage, the print head can be expected to last up to 10 years. Now that's reliability! The automatic cutter function enables you to cut a label with the touch of a button. And unlike some competing models, the cutting blade can be changed easily.

Size matters

You'll appreciate the EZL500 printer's oversized, wide-spaced keys, so you won't hit multiple buttons by mistake. Use hard-coded function keys for immediate access to frequently used functions. Soft-menu keys are ideal for infrequent functions. Able to handle a variety of tapes ranging from a quarter-inch to an inch wide, the EZL500 printer enables you to use more media than any other thermal label printer. The integral cassette sensor automatically adjusts the unit to your tape's width and media type – so you don't have to reprogram the printer with each cassette change!
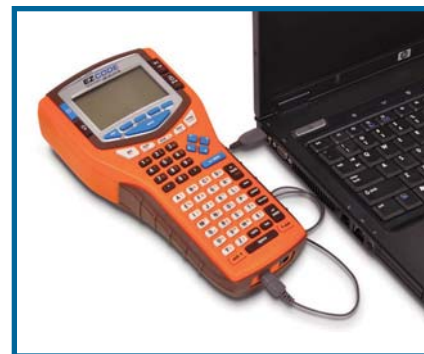

Do more, do more longer

The EZL500 printer runs on six standard AA batteries or an optional, rechargeable 7.4 volt Li-ion battery. The Li-ion battery has a longer life than standard batteries and lasts longer than most other rechargeable batteries.

In short, the EZL500 printer is ready to work on the lengthy jobs you have now and the ones you'll be doing years down the road.

When you're working in tight spaces, the handy magnet strap lets you to stick the EZL500 printer to a vertical metallic surface to free your hands until you need to use it again.

With the included PC connection software and built-in mini USB port, you can print directly from your computer and easily upgrade the software.
