

## Superstrut® beam clamps

Beam clamps for mounting channel

### Materials

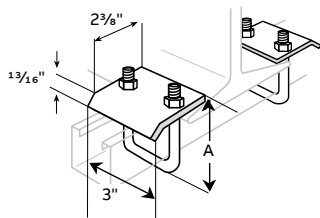

Most products are manufactured from hot-rolled carbon steel bars or hot-rolled strip steel. Pipe rollers are cast iron. Products which are copper plated carry the letter "T" in the prefix.

### Design Loads

Where design loads are indicated, they provide for a safety factor of 3 in conformance with the "AMERICAN STANDARD CODE FOR PRESSURE PIPING."

GoldGalv® hardware finish is standard for all Superstrut® products. This is a multi-process finish of electro-plated zinc, followed by gold-colored trivalent chromium to give excellent corrosion resistance and a superior paint base. See pages 4-5 for a complete description of the GoldGalv® hardware finish. GoldGalv® hardware will be furnished if no other finish is specified.

### U501 & U502

Cat. No.	For channel	A (in)	STD CTN
U501	A-1200 A-1400	3 <sup>3</sup> / <sub>16</sub>	20
	B-1200 B-1400		
	C-1200 B-1402		
U502	A-1202 A-1402	4 <sup>13</sup> / <sub>16</sub>	20
	C-1202 H-1200		

Furnished complete.

Design load U501 – 2,150 lbs.

U502 – 3,000 lbs.
