Features

Light System

This low voltage fixture uses two 20W Xenon G4 lamps to provide ample lighting to undercabinet applications. The 0.025" solid steel construction provides for efficient heat dissipation. Face and oval lens provides a clean aesthetic design and appearance. Glare is reduced with the oval frosted lens.

Mounting

Each fixture can be surface mounted using the included mounting hardware.

Kit Includes

- One two-light Xeno bar.
- 6' power cord.
- Link connector.
- Mounting hardware.

Electrical System

Power switch provides two different light levels. This fixture may be connected to a hardwire box (ALFT6300-WH – sold separately) using a flexible wire connector (FBT61xx-WH – sold separately).

Labels

cULus listed.

Linkability

Up to seven fixtures can be connected in-line to power source. These fixtures may be linked using 12" flexible wire connector (CLT6100-WH – sold separately), or a link connector (included).

Description

This Xenon light bar provides ample lighting for task or undercabinet lighting applications. An on-body switch to control light level, this fixture may provide various levels of light control.

Notes: Accessories should be ordered separately. For additional options please consult your Liteline representative. Due to our continued efforts to improve our products, product specifications are subject to change without notice.
