

**No derating of 600 watt models in multi-gang applications.**

**Easy-to-grip knob with soft, contemporary curves** goes with any décor. Interchangeable with older-style knobs.

**Slimmer design** — the trimmest rotary dimmers, 1/4" less depth than the leading competitor's models. More room left in the box means easier installation.

**Excellent RFI/EMI filtering performance** — won't impact sensitive electronic devices.

**Pre-stripped leads** speed termination.

**Illuminated models** are easy to find in the dark.

Cat. No.	Description	Rating	Colors
<b>Rotary Dial On/Dial Off Incandescent Dimmer</b>

## Pass & Seymour

# Simple control, advanced performance.

Our previous Rotary Dimmers were our best sellers. They earned the appreciation of contractors, builders, and homeowners with their easy installation, simple operation, and dependability. But we weren't willing to settle for "very good." We developed an entirely new design to make them better than ever — and better than our competitors' rotary dimmers, too.

How? With more choices, in standard, preset, and illuminated models. A smooth new style that fits in everywhere. Control that provides a wider dimming range. Superior radio-frequency and electromagnetic interference suppression. A slimmer profile to leave more room in the box so installation's faster and easier.

Even with all those improvements, we ensured that our latest P&S Rotary Dimmers are easily affordable. And that means you get exceptional value.

R600-PLA

Exceptional  
value  
and style.
