Lytecaster Decorative Lens Wet Location

Recessed Downlighting

Lightolier introduces the latest addition to our popular line of recessed downlights. The new Lytecaster Decorative Lens Wet Location redefines the concept of style and functionality.

The trim's flush design allows for a clean architectural look while the frosted polycarbonate flange creates an elegant glow against the ceiling. The textured lens shields the lamp source and completes the look providing a clean classic style that fits in any decor.

Great looking and functional... This trim is fully cCSAus listed for wet locations and the non-metallic features make it NEC certified for use over Spas and hot tubs. Its increased wattage capability over standard wet location fixtures also makes this the perfect choice for closets, outdoor soffits and food service areas.
