

Features/Benefits

- Extended Life
- · Reduce maintenance costs by extending the relamping cycle
- Warranty period: 30 months
- Outstanding lumen performance
- 95% lumen maintenance and reduced lamp-end blackening
- Better for the environment
- Only 1.7mg of mercury with ALTO IITM Technology
- · Reduced impact on the environment without sacrificing performance

Applications

· Ideal for applications requiring maximum maintained light output.

Notes

- Rated average life under specified test conditions with lamps turned off and restarted no more frequently than once every 3 operating hours. Lamp life is appreciably longer if lamps are started less frequently. (202)
- Average life under engineering data with lamps turned off and restarted once every 12 operating hours.(241)
- Approximate Initial Lumens. The lamp lumen output is based upon lamp performance after 100 hours of operating life, when the output is measured during operation on a reference ballast under standard laboratory conditions. (203)
- For expected lamp lumen output, commercial ballast manufacturers can advise the appropriate Ballast Factor for each of their ballasts when they are informed of the designated lamp. The Ballast Factor is a multiplier applied to the designated lamp lumen output. (204)
- Design Lumens are the approximate lamp lumen output at 40% of the lamp's Rated Average Life. This output is based upon measurements obtained during lamp operation on a reference ballast under standard laboratory conditions. (208)
