

GT3D Series — Digital Timers

Key features of the GT3D series include:

- Precise time setting using digital thumbwheel switches
- Elapsed or time remaining LED display
- 6 time ranges, 16 timing functions
- Time delays up to 99.9 hours

UL Recognized
File No. E55996

CSA Certified
File No. LR58183
LR96764
LR83814

Cert. No.
BL9801133323911 (LVD)
E9971113332388 (EMC)

		GT3D-2	GT3D-3	GT3D-4	GT3D-8	
Specifications	Operation System	Solid state CMOS circuitry				
	Operation	Multi-mode			Multi-mode, one-shot output	
	Time Range	0.01s to 99.9 hours				
	Rated Voltage	100 to 240V AC (50/60Hz), 24V AC (50/60Hz)/24V DC				
	Contact Ratings	125V AC/250V AC, 3A; 30V DC/1A (resistive load)	125V AC/250V AC, 5A; 30V DC/5A (resistive load)			
	Contact Form	Delayed SPDT + instantaneous SPDT	Delayed DPDT	Delayed DPDT	Delayed DPDT	
	Minimum Applicable Load	5V, 10mA (reference value)				
	Voltage Tolerance	AF20 (100–240V AC): 85 to 264V AC AD24 (AC): 20.4 to 26.4V AC AD24 (DC): 21.6 to 26.4V DC				
	Error	±0.3% ±50ms (voltage, repeat, and temperature)				
	Setting Error	±0.5% ±50ms				
	Reset Time	60ms maximum				
	Insulation Resistance	100MΩ minimum				
	Dielectric Strength	Between power and output terminals: 2,000V AC, 1 minute Between contacts of different poles: 2,000V AC, 1 minute Between contacts of the same pole: 750V AC, 1 minute				
	Power Consumption (approximate)	AF20	11.8VA	11.6VA	3.7VA (100V AC, 60Hz) 11.6VA (200V AC, 60Hz)	
		AD24 AC/DC	1VA/0.8W	2.1VA/0.9W	2.1VA /0.9W	
	Mechanical Life	10,000,000 operations minimum		5,000,000 operations minimum		
	Electrical Life (at rated load)	50,000 operations minimum		100,000 operations minimum		
	Outputs	Relay	250V AC, 3A, 30V DC, 1A (resistive load)	240V AC/, 24V DC, 5A (resistive load)		
Vibration Resistance	100N (approximate 10G)					
Shock Resistance	Operating extremes: 100N (approximate 10G) Damage limits: 500N (approximate 50G)					
Operating Temperature	–10 to +50°C					
Storage Temperature	–30 to +80°C					
Operating Humidity	45 to 85% RH					
Weight (approximate)		70g	75g	76g		
Housing Color	Gray

Interval 1

Cycle 1 (OFF first)

Cycle 3 (ON first)

GT3D-4 Timing Diagrams

These timers require a start input. A gate and reset input are optional. Inputs are controlled by external pushbuttons. Reset occurs when the power is removed or when the reset input is supplied. The gate signal can be used to interrupt (freeze) timer functions. Timer functions resume when the gate input is removed. B style timers are not equipped for gate input.

Timers

Instructions: Setting GT3D-2, GT3D-3 Timers

Step 1	Desired Mode/Selection				Remarks
Select the desired time display and operation modes.	Time Display Mode	① Indicator Mode Selector	Operation Mode	② Operation Mode Selector	1. Use the flat screwdriver to set the selectors. Since selectors do not turn all the way around, both clockwise and counterclockwise rotation may be necessary. 2. The ① Indicator Mode Selector determines whether the Digital Time Display shows the time elapsed or time remaining. The ② Operation Mode Selector determines the desired operation mode. Decide which display and mode is desired, then use these two selectors ①② to set the operation mode. 3. The ② Operation Mode Selector has two blank modes which are not intended for use. Always have this selector set to A, B, C, or D.
	Time elapsed	⎓ 1	ON-delay 1	A	
	Time remaining	▀ 1		A	
	Time elapsed	⎓ 1	Interval	B	
	Time remaining	▀ 1		B	
	Time elapsed	⎓ 1	Cycle 1	C	
	Time remaining	▀ 1		C	
	Time elapsed	⎓ 1	Cycle 3	D	
	Time remaining	▀ 1		D	
Step 2	Desired Operation	Selection		Remarks	
Select a time range that contains the desired period of time.	Base Time Ranges	③ Time Range Selector		1. The ③ Time Range Selector controls both the decimal point indicator (9.99, 99.9, 999) and the time increment indicators S (seconds), M (minutes), and H (hours). 2. Chose which base time range contains the targeted timer setting. Then use the ③ Time Range Selector to set the decimal point indicator and time increment indicator to its corresponding pair of settings. 3. Since these configurations offer a complete range of settings from 0.01 seconds to 99.9 hours, the setting of 9.99 for minutes and the 9.99 and 999 settings for hours are not listed and should not be used.	
		Decimal Point Indicator	Time Increment Indicator		
	0.01 seconds to 9.99 seconds	9.99	S		
	0.1 seconds to 99.9 seconds	99.9			
	1 second to 999 seconds	999			
	0.1 minutes to 99.9 minutes	99.9	M		
	1 minute to 999 minutes	999			
0.1 hours to 99.9 hours	99.9	H			
Step 3	Desired Operation	Selection		Remarks	
Set the precise period of time desired by using the ④ Time Setting Digital Switch.				Use the ④ Time Setting Digital Switch to set the desired period of time. It is important to remember that the setting of the ③ Time Range Selector determines the units of time measurement as well as the implied decimal point location.	

It is important to remember that the ③ Time Range Selector not only selects the time range but also influences the interpretation of the Digital Time Display. Changing the ③ Time Range Selector setting changes the units of time measurement (seconds, minutes, hours) as well as the decimal point location.

			Decimal Point Indicator		Time Increment Indicator
	0.01 seconds to 9.99 seconds	9.99	S		
	0.1 seconds to 99.9 seconds	99.9			
	1 seconds to 999 seconds	999			
	0.1 minutes to 99.9 minutes	99.9	M		
	1 minute to 999 minutes	999			
0.1 hours to 99.9 hours	99.9	H			
Step 3	Desired Operation	Selection		Remarks	
<p>Select the desired period of time by using the ④ Time Setting Digital Switch.</p>				<p>Use the ④ Time Setting Digital Switch to set the desired period of time. It is important to remember that the setting of the ③ Time Range Selector determines the units of time measurement as well as the implied decimal point location.</p>	

It is important to remember that the ③ Time Range Selector not only selects the time range, but also influences the interpretation of the Digital Time Display. Changing the ③ Time Range Selector setting changes the units of time measurement (seconds, minutes, hours) as well as the implied decimal point location.

Instructions: Setting GT3D-8 Timers

Step 1	Desired Mode of Operation	Selection	Remarks	
Select the time display and operation modes.	Operation Mode	Time Display Mode	① Indicator Mode Selector	
	ON-Delay One-Shot	Time elapsed		
		Time remaining		
	Cycle one-shot	Time elapsed		
		Time remaining		
	ON-delay one-shot 2	Time elapsed		
Time remaining				
Step 2	Desired Mode of Operation	Selection	Remarks	
Select the single shot output time.	Desired Single-Shot Output Time	② Single-Shot Output Time Selector	On the GT3D-8 timers, the desired single-shot output time can be selected from the A, B, C, D, E, and F modes using the ② One-Shot Output Time Selector.	
	0.1 seconds	A		
	0.5 seconds	B		
	1 second	C		
	5 seconds	D		
	10 seconds	E		
	50 seconds	F		
Step 3	Desired Mode of Operation	Selection	Remarks	
Select the time range that contains the desired period of time.	Base Time Ranges	③ Time Range Selector	1. The ③ Time Range Selector controls both the decimal point indicator (9.99, 99.9, 999) and the time increment indicator: S (seconds), M (minutes), and H (hours). 2. Chose which base time range contains the targeted timer setting. Then use the ③ Time Range Selector to set the decimal point indicator and time increment indicator to its corresponding pair of settings. 3. Since these configurations offer a complete range of settings from 0.01s to 99.9 hours, the setting of 9.99 for minutes and the 9.99 and 999 settings for hours are not listed and should not be used.	
	0.01 seconds to 9.99 seconds	9.99		
	0.1 seconds to 99.9 seconds	99.9		
	1 second to 999 seconds	999		
	0.1 minutes to 99.9 minutes	99.9		
	1 minute to 999 minutes	999		
0.1 hours to 99.9 hours	99.9			
Step 4	Desired Mode of Operation	Selection	Remarks	
Select the desired period of time by using the ④ Time Setting Digital Switch.			Use the ④ Time Setting Digital Switch to set the desired period of time. It is important to remember that the setting of the ③ Time Range Selector selects the units of time measurement as well as the implied decimal point location.	

G Timers

It is important to remember that the ③ Time Range Selector not only selects the time range, but also influences the interpretation of the Digital Time Display. Changing the ③ Time Range Selector setting changes the units of time measurement (seconds, minutes, hours) as well as the decimal point location.
