Waterfall Series Stainless Steel Sloped Top Enclosure

Wash-down Sloped Top Series

- 25 degree sloped top
- Easy to clean design features
- NSF Approved

HW Stainless Steel Enclosures - NEMA 4X

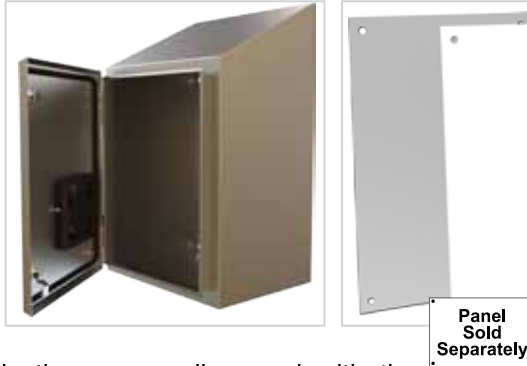

Waterfall Series (HWSTSS)

Waterfall Series - Sloped Top Enclosures (HWSTSS)

Another great addition to the already extensive line of stainless steel product offered by Hammond Mfg.

Waterfall enclosures are primarily designed for wash-down applications but can also be used wherever a sloped top is preferred.

Food and Beverage applications are well served with the preferred NSF approval carried by the Waterfall Series. Various standard features including the highly accessible, easy to clean hinge design make this design ideal for wash-down environments. Numerous accessories and upgrades are available to further increase cleaning performance.

Available in an industry leading selection of sizes in 304 and 316L stainless steel.

Waterfall Series Features

25 degree sloped top – quickly sheds water during wash-down

External lift-off hinge (not hidden) allows for quick thorough cleaning

“V” formed body flange channels water away and provides additional gasket protection during pressure wash processes.

Top/bottom door edges sloped to shed water effectively. Gap between door edges and body provide superior access for flange cleaning.
