

## Grounding Studs

### Type TBGS Structural Grounding Studs

Knurling ensures excellent mechanical pull-out and electrical continuity

- Easily welded to steel structures with minimal construction welding equipment
- Connect to grounding conductors with appropriate Thomas & Betts grounding connectors
- Knurled portion of stud resists pull-out and provides electrical continuity to ensure the integrity of the grounding circuit
- Constructed of high-strength steel and coated with corrosion-resistant copper cyanide

Cat. No.	Rod Size (in.)
<b>TBGS-14</b>	0.25
<b>TBGS-38</b>	0.38
<b>TBGS-58</b>	0.63
<b>TBGS-34</b>	0.75
