POWER MANAGEMENT
Modules

power management

Easy-to-install and ideal for basic power or communication and low voltage installations.

AU1001
lyriQ™ High Performance Keypad Power Module

AU1001

LYRIQ HIGH PERFORMANCE KEYPAD POWER MODULE

The lyriQ High Performance Power Module supports up to four lyriQ High Performance Keypads. It's a single bay module and features dual power input connections.

Notes: Bracket included. One or two power supplies required depending on the amount of keypads installed. (See page 41)

PW1012
Universal Power Distribution Module

PW1012

UNIVERSAL POWER DISTRIBUTION MODULE

Three 12 V and three 24 V DC power ports for use with On-Q and compatible third party products. Module includes a 30 W 24V power supply and three DC power cords. Eliminates clutter in the enclosure allowing for one module to power several devices. Includes module bracket 24 V fuse to protect products from over currents.

Notes: Bracket, 30 W Power Supply (PW1060) and three female power cables included.

PW7639
Multi-Voltage Power Distribution Module

PW7639

MULTI-VOLTAGE POWER DISTRIBUTION MODULE

The multi-voltage power distribution module allows you to power a wide variety of modules and devices. It includes three 15 V DC ports, two 12 V DC ports and one 5 V DC port.

Notes: Requires F7715 15 V power supply.
