

## Features

- Installs easily
- Works with CAT 5e and higher, fiberoptic and coaxial cable
- Allows for horizontal and vertical change of direction
- Suitable for air-handling spaces (plenum rating)
- UL® Listed
- Complies with the NEC®, the CEC® and TIA<sup>SM</sup> standards

**Residential  
Application**

The CADDY® CATCR50 Cable Retainer is a plastic, low-voltage cable support with an easy-lock closure and an attachment base. The new cable retainer from ERICO® can be installed on walls, beams, studs, ceilings and racks – vertically or horizontally – which makes it extremely versatile. It is also suitable for air-handling spaces (plenum rating). The CADDY CATCR50 support has rounded edges to avoid over-bending and kinking of cables.

The patented closure permits cable to be added quickly and easily. The locking teeth retain bundled cable in a one-piece support. The CADDY CATCR50 is UL® Listed. It also complies with the NEC®, the CEC® and TIA<sup>SM</sup> standards.

CADDY CATCR50 is designed for use with CAT 5e and higher, fiberoptic and coaxial cable in both commercial and residential applications. Installation is completed with a nail, screw, push pin or pop rivet.
