**The Raintight Difference:**

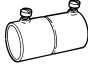

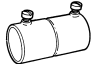

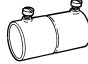

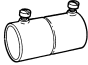

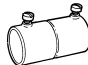

Listing agencies recently implemented a specification revision that caused industry standard split ring compression connectors to be incapable of passing raintight testing. Bridgeport solved this issue by developing a patented EMT raintight design and became the industry's first manufacturer to meet the more stringent raintight listing requirements, ensuring their products consistently and effectively excluded water. This allowed Bridgeport to mark their fittings "RAINTIGHT". Some manufacturers have elected to colour code their raintight gland nuts for identification purposes. Exclusive to Bridgeport is the use of the colour blue on their zinc EMT raintight fittings.

Nesco inventories raintight fittings in both steel and zinc die cast material from 1/2" - 4" trade size.

### **Bridgeport # 1701-DC & 1702-DC Locknut-Less EMT Connectors**

Locknut-less zinc die cast EMT connectors from **Bridgeport Fittings** saves installation time while providing safe and secure attachment of 1/2" or 3/4" EMT. Designed to ease assembly of raceway where space is limited inside the box or locknut is difficult to tighten.

Simply tilt and snap the connector into the outlet box and insert the EMT conduit. Tightening the set screw causes the front of the connector to create wedging action against the knockout hole for a tight fit.

**It's faster and more profitable in every way.**
