The Raintight Difference:

Listing agencies recently implemented a specification revision that caused industry standard split ring compression connectors to be incapable of passing raintight testing. Bridgeport solved this issue by developing a patented EMT raintight design and became the industry's first manufacturer to meet the more stringent raintight listing requirements, ensuring their products consistently and effectively excluded water. This allowed Bridgeport to mark their fittings "RAINTIGHT". Some manufacturers have elected to colour code their raintight gland nuts for identification purposes. Exclusive to Bridgeport is the use of the colour blue on their zinc EMT raintight fittings.

Nesco inventories raintight fittings in both steel and zinc die cast material from 1/2" - 4" trade size.

Grounding Locknuts

Bridgeport now offers Grounding Locknuts from 3/4" to 4" Trade Sizes. These versatile locknuts are ETL Listed for use with all of Bridgeport Fittings' EMT and Rigid connectors, as well as threaded Rigid/IMC conduit.

Bridgeport's grounding locknuts provide a secure connection to the enclosure, and 3 tapped holes for proper placement of the ground lug. When thread length is limited, these can be used in place of a grounding bushing and standard locknut. Simply remove the standard locknut and thread on the grounding locknut.

Bridgeport's problem-solving grounding locknuts are not just for threaded hubs anymore. Also suitable for Service Entrance Equipment.

Mighty-Seal® Raintight Reducing Sealing Washers

Bridgeport Fittings' Raintight Sealing Reducing washers maintain the 3R rating of any enclosure when installing raceways in oversized knockouts, or when concentric knock-out rings break out larger than expected. These items are listed for use with Bridgeport's Raintight connectors, as well as Rigid/IMC conduit.

Simply install the EPDM rubber-coated galvanized washer on the exterior of the enclosure and the non-coated washer (provided) on the interior between the fitting and the locknut, or between two locknuts when using rigid conduit.
