INTRODUCTION

This manual provides the most comprehensive information about IPEX PVC systems – from basic raw material to installation characteristics of the finished product. Written with the engineer, contractor and distributor in mind, it is based on laboratory test results and IPEX’s many years of field experience.

At IPEX, we have been extruding Scepter PVC conduit and molding Scepter PVC fittings since 1951. We formulate our own compounds, maintain strict quality control during production, and offer one of the most comprehensive lines of PVC electrical products throughout North America.

More important, our commitment to our customer extends beyond the sale. Quality control and thorough jobsite field reports have earned IPEX a reputation for product quality and service excellence.

Engineers, electricians, contractors, specifiers and utilities have realized for many years the advantages of PVC. Today, IPEX electrical systems include Scepter® PVC conduit and fittings, Kwikflex™ liquidtight flexible nonmetallic conduit and fittings, Super Duct™ power and communication ducts, Kwikon® ENT and fittings, and Kwikpath® Communication Raceway Systems. These brands are the number-one choice for power, communication and data needs. Whether exposed, concealed in walls, encased in concrete, or directly buried, IPEX electrical systems are preferred For The Long Run.

Only when you specify IPEX by name are you guaranteed our commitment to excellence.
