

NEW PRODUCT SHOWCASE

New Kwikon® 90° Stub Down Fittings (Kwikon x Threaded and Kwikon x Kwikon)

**A complete nonmetallic system
for stub down applications
in the concrete slab deck**

FEATURES AND BENEFITS:

- Complete nonmetallic system for stub down applications
- Simple installation reduces labor costs
- Protective seal on base
- Rugged lightweight, concrete-tight design
- Optimal height and bend radius

Products are manufactured by IPEX Electrical Inc.
and distributed in the United States by IPEX USA LLC.
Kwikon® is a trademark of IPEX Branding Inc.

IPEX continues to expand its leading Kwikon ENT fittings product line with the addition of the Kwikon threaded 90° stub down fitting (Kwikon x Threaded) and the introduction of an industry first – the Kwikon 90° stub down (Kwikon x Kwikon).

Both fittings are designed for direct connection to ENT on the horizontal by means of our patented six locking tab concrete-tight Kwikon connection. The flanged base of the threaded 90° stub down offers contractors a NPSC threaded hub connection on the vertical – at the exit point of the slab, allowing for the direct transition to other raceway products.

With our unique Kwikon x Kwikon stub down fitting, the user creates a stub down of ENT without penetrating the form. After the concrete pour the permanently encased fitting will be flush with the bottom of the slab deck, ready to accept the connection of ENT raceway.

Designed to offer the optimal balance of bend radius and overall height in the slab, these fittings provide a bend radius of 2-1/2" while standing less than 3-3/8" tall.

Valuable features on the new stub downs include embossed lines on the top face of the flange, designed to assist contractors with visually aligning the placement of the stub downs during installation; and the inclusion of a protective seal on the flanged base to safeguard against possible concrete infiltration.

Made of nonmetallic, non-conductive and non-corroding PVC, these fittings are durable and lightweight, perfect for the tough poured concrete slab environment.
