

Quick Connect Extension System

Multiple extensions can be joined

Flexible shaft allows easy access to difficult and tight areas

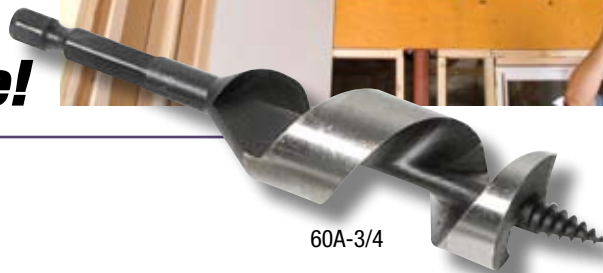

Hard to reach...not any more!

Greenlee is proud to announce the all new Quick Connect Flexible Extensions and Quick Connect Extension kit. The Quick Connect Extension System comes with everything needed to drill and pull light to medium wire. The multiple length Quick Connect Extensions are designed for increased versatility from short to long jobs, and the flexible shaft on the extensions allows for easy access to difficult and tight areas. The Quick Connect's convenient 1/4" quick connect receiver accepts most 1/4" quick change drilling and pulling accessories 3/4" diameter and under.

The flexibility of the Quick Connect's shaft and the ability to easily change the length make this product superior to other drill extension products. Competitive products are not as flexible and most do

not allow you to adjust the length. With the Quick Connect Extension System, you can drill holes through multiple joists from one location by customizing the length needed to reach your destination.

Each extension connects and snaps into place so that you know it's secure. This is a very versatile tool, whether you need to make a hole 60 inches away or 12 inches away, the Quick Connect Extension System is the right set of tools for the job.

Features

- Flexible shaft allows easy access to difficult and tight areas
- Convenient 1/4" quick connect receiver accepts most standard quick change accessories.
- Multiple extensions can be easily joined to create the perfect length for any job.
- Capacity: Any 1/4" quick change accessory 3/4" diameter and under.
