

ACCUBEAM™ LAMPS use an innovative reflector design that forms the light beam before it reaches the lens. The innovative corrugated reflector allows for greater light concentration at the centre of the beam giving a light output that is comparable to conventional halogen using less wattage.

ACCUBEAM was designed to deliver a smooth, precise beam pattern and allows for even light distribution; without hot spots or striations.

Order code	Description	Watts (W)	Base	Volts (V)	Beam angle (°)	Beam spread	CBCP (cd)	Average life (hrs)	Initial lumens (lm)	Case qty
PAR20
