

SAFETY FEATURES

Pre-cut design eliminates dangerous activities such as cutting and transporting long lengths of strut

CADDY ROD LOCK hardware can be used with threaded rods with burrs and minor imperfections

Captive hardware reduces the likelihood of dropped parts and makes height adjustments easier

Lock nut can be finger tightened, disengaging the CADDY ROD LOCK "push-to-install" mechanism (after installation)

The color of the line corresponds to the larger goal of each feature:

SAFETY FEATURES

FASTER INSTALL FEATURES

STRENGTH FEATURES

FASTER INSTALL FEATURES

Available in a wide range of pre-cut lengths ready to install

Strut profile is compatible with standard strut hardware

STRENGTH FEATURES

Retains the strength of standard strut by using CADDY ERISTRUT Strut Channel Type A, Slotted [1-5/8" x 1-5/8" - 12GA] or CADDY ERISTRUT Strut Channel Type C, Slotted [13/16" x 1-5/8" - 14GA]

Prefabricated assemblies easily lift and lock into place with CADDY ROD LOCK hardware, helping save time and money

Internal studies have indicated time savings of up to **69%** when installing a 2-tier trapeze with one person

CADDY ROD LOCK hardware is available in 3/8" size to provide the required strength for the services being supported
