Features	
Catales	
	Color-coded end pieces provide for visual identification of maximum conductor size. Color-coded tape further eliminates errors and speeds up installations. Funnel shape swiftly guides conductor into position for insertion.
	Pilot cap envelops strands and guides conductor
	past serrated jaws and into the center of the splice.
	Die-cast, precision-made jaws provides optimum
	contact area for a greater range of conductor sizes. Compression spring positions the jaw for positive conductor acceptance.
	High-Strength aluminum alloy tubing covers the
	connection for superior corrosion protection and
	long-lasting durability. Tubular center stop automatically determines proper insertion length of both con-
Company	ductors.
