fication of maximum conductor size. Color-coded tape further eliminates errors and speeds up installations. Funnel shape swiftly guides conductor into position for insertion. Pilot cap envelops strands and guides conductor past serrated jaws and into the center of the splice. Die-cast, precision-made jaws provides optimum contact area for a greater range of conductor sizes. Compression spring positions the jaw for positive conductor acceptance. High-Strength aluminum alloy tubing covers the connection for superior corrosion protection and long-lasting durability. Tubular center stop automatically determines proper insertion length of both conductors.
