Catamount® Cable Ties are available in lengths from 4 in. to our exclusive 48 in. strap. Cable Ties will satisfy bundling requirements from 1/16 in. to 15 in. and loop tensile strengths from 18 to 175 pounds. Cable Ties are stocked in materials and colours as listed. Contact your Regional Sales Office for availability in special colours. Where applicable, Catamount® Cable Ties are UL Recognized, Mil-Spec Approved and/or QPL Listed. State-of-the-art robotic and raw material handling equipment assures product and material integrity throughout the manufacturing process. Overall quality is achieved through statistical analysis and quality driven operator objectives. Catamount® has attained Mil-Spec I-45208 quality ratings from a number of equipment manufacturers. Catamount® products are sold through stocking T&B® Distributors.

About Nylon...

Nylons possess an outstanding balance of properties combining strength, moderate stiffness, high service temperature and a high level of toughness. Nylon is particularly resistant to repeated impact, has a low co-efficient of friction and excellent abrasion resistance.

Nylon is resistant to fuels, lubricants and most chemicals, but is attacked by phenols, strong acids and oxidizing agents. Contact your Regional Sales Office for chemical data relative to your application.

Nylon is inherently susceptible to environmental conditions. Catamount® Cable Ties are moisturized to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable Ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

Sample Thickness (in.)	UL Flammability	Energy Source	Specific Optical Density	
			at Maximum Smoke Accumulation	at 2 Minutes
NBS Smoke Generation for 6/6 Nylon				
1/16	94 V-2	Radiant (2.5 watts/sq cm)	13	0
1/8	94 V-2	Radiant Plus Flaming Gas Jets	26	1

Results as provided by National Bureau of Standards (NBS). Results may not be directly correlated with larger fires, such as burning buildings. Materials should be tested to your application.

Material	Minimum Thickness (in.)	Temperature Index		Hot Wire Ignition (sec)
		Electrical (°C)	Mechanical w/o Impact (°C)	
Temperature Index for Molded Nylons				
6/6 Nylon	0.580	1.25	85	15.0
UV Black Nylon	0.120	1.25	85	35.0
Heat Stabilized Nylon	0.120	1.30	110	20.0

Temperature Index is the temperature at which the specific property will decrease to one-half its original value after 60,000 hours exposure at that temperature.

Cable Ties

Catamount® Ties and Terminals fit the needs of general-purpose fastening and wire terminations. Installers quickly discover that Catamount® products offer durable and value-priced cable bundling for a variety of commercial and residential construction applications. Electricians can also take advantage of other benefits in stocking Catamount® products in their toolboxes, such as more terminals per bag in most popular sizes than leading comparable brands.

Catamount® Ties and Terminals are offered in a wide range of sizes, styles and colours and meet listing requirements for most electrical termination and fastening projects. A choice of matching tools are also offered to provide quick and reliable installations.

MPNY-1000S-0-C	#6 Screw	Black Nylon

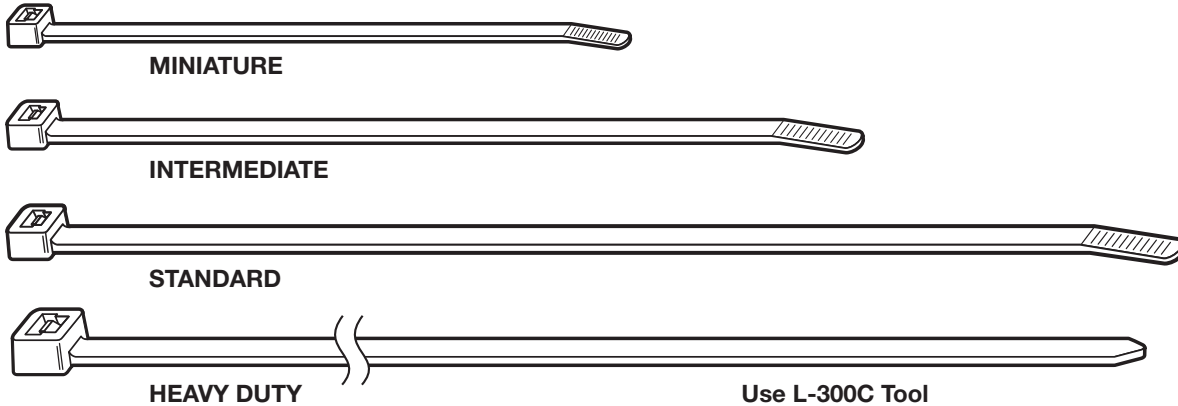

For use with 18–50 lb. Cable Ties.

- Mounting Surface should be cleaned with alcohol based (IPA) cleaner before application
- Acrylic Based may be repositioned initially. Allow 24–72 hours setup for maximum performance with Acrylic Based adhesives
- For Rubber Based, allow 15 minutes setup for maximum performance

Cable Ties

Catamount® Military Specification Ties

The following cable ties meet the stringent requirements of military specifications. To locate ties that meet a particular specification, refer to the chart below.
