

## Brackets

### Small mounting base

These versatile mounting bases can be used as a wall-mount attachment, as a support for electrical outlet boxes and as an under-floor attachment. Quick and easy to install, tray mounts securely to the base using fold-over tab attachments. No additional hardware is required.

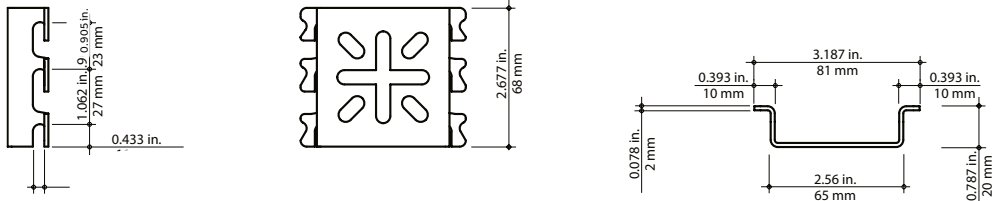

The small mounting base is available in hot-dipped galvanized steel and stainless steel (type 316) and can be used for tray widths from 4 in. to 24 in.

Express tip: Refer to page 52 for an application example.

## Accessories

### Wall termination / universal blind end

Support and terminate runs of cable tray with this wall termination angle. Can be used as a wall support, floor-to-ceiling support or to safely terminate any tray run. Adapts to any configuration and any width.

Available in pregalvanized steel. Mounting hardware sold separately.

Express tip: Refer to page 52 for an application example.  
Tool required: 10 mm nut driver

### 90-degree bracket

Create high strength tee, cross and other 90-degree configurations with this 90-degree bracket. Available in hot-dipped galvanized steel either as a single bracket or a kit.

Kit includes one (1) bracket, four (4) bracket clamps and one (1) hot-dipped galvanized universal splice.

Express tip: Refer to page 44 for an application example.  
Tool required: 10 mm nut driver

## Accessories

### Cable drop-out

This 2 in. radius cable drop-out protects cables when exiting or entering tray by reducing the strain on the cables. The drop-out attaches to tray with built-in tabs. No hardware is required.

Three different widths available in pregalvanized steel. This drop-out is suitable for use with all tray widths and heights.

Express tip: Refer to page 45 for an application example.

### Large cable drop-out

For larger cable tray widths and heavier cable loading, use the 7 in. radius large cable drop-out to protect cable exiting or entering tray runs. Available in pregalvanized steel, the large cable drop-out has a versatile slotted design that enables the use of Ty-Rap® cable ties to attach the cable bundles to the drop-out.

Use built-in tabs to attach to siderails or universal clamp (see page 27) to attach to the end of cable runs.

Express tip: Refer to page 45 for an application example.

### Side hanger clamp

The side hanger clamp is used to construct trapeze supports using threaded rods. The offset support hole allows for trouble-free access to support nuts for height adjustment, and the rod can continue downward to allow for multi-level (tiered) trapeze installations.

A set screw holds tray firmly in position once installation is complete. Available in pregalvanized steel. For use with 3/8 in. threaded rod.

Express tip: Refer to page 49 for an application example.

### Universal clamp

The universal clamp is used to secure large cable drop-outs to the end of a cable run as well as attaching bottom inserts to lengths of ExpressTray.

Express tip: Refer to pages 45–46 for application examples.

Note: To hold down 2 in. x 2 in. wire basket tray, use 1 ETH-UNIVC-XX with bottom half of ETH-SP-XX. See page 16.

### Threaded rod clamp

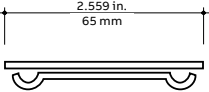

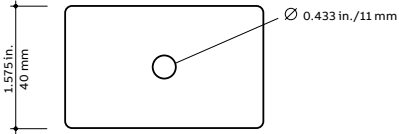

This clamp is used for center-hung applications to secure tray sections to threaded rod for ceiling mounting and can be used with U-profile tray in 4 in., 8 in. and 12 in. widths. This clamp is not designed for use with C-profile tray.

Available in pregalvanized steel, hot-dipped galvanized steel and stainless steel (type 316). For use with 3/8 in. threaded rod.

Express tip: Refer to page 48 for an application example.

### Superstrut® threaded rod

Used for overhead mounting of ExpressTray with threaded rod clamp, side hanger clamps or strut.

Available in 1/4 in. and 3/8 in. diameters, threaded rods are made of electro-galvanized steel.

Express tip: Refer to pages 47–49 for application examples. Order nut and washer separately. (See page 34).

### Cover and bottom insert

ExpressTray covers and bottom inserts protect cables from dust build-up and provide a physical barrier in environments where cables must be protected from machinery or vandalism. Attach bottoms to tray using universal clamps (see page 27) and secure covers using cover clips (see page 32).

Available in pregalvanized steel in widths from 2 in. to 24 in. Available in lengths of 120 in. or 40 in. Available in solid or vented design.

Express tip: Refer to page 46 for an application example.

### Cover clip

Secure covers to tray quickly with this cover clip. Available in stainless steel (type 301), the cover clip uses built-in tabs to secure the cover and to

facilitate removal of the cover when required. No tools required.

Express tip: Refer to page 46 for an application example.

### Blackburn grounding connector

Note: To ensure electrical continuity, the Blackburn GPT-2 grounding connector and ground wire MUST be used in all Quiklok series tray applications. The GPT-2 grounding connector is used for bonding applications not exceeding 300 A (as per Table 16 of CEC) and is ideal for conductors #14 to #4 AWG.

For applications requiring larger conductors, contact your regional sales office for further information.

## Accessories

### ETG lay-in ground lug

- Lay-in lug design easily installs onto any ExpressTray 2 in. through 4 in. deep without any disassembly required
- Approved for steel and stainless steel wire mesh trays
- Accepts 12 AWG solid through 2 AWG stranded aluminum and 14 AWG solid/stranded through 2 AWG stranded copper conductors
- “Slotted hook” design sits securely onto the ExpressTray mesh intersections to restrict swiveling
- Must be used on each length of QuikLok series tray applications to meet CSA requirements

### Superstrut “BAT” clip

Attaches ExpressTray to strut

- One-piece construction
- No installation tools required
- Reduces installation time to the minimum
- For horizontal applications

Cat no.	Material	Weight	
		lb/ea.	kg/ea.
SSF-CK535	Spring steel with zinc phosphate finish (black)	1.20	0.55

Note: “BAT” clip should be used for horizontal tray/strut applications. For vertical tray/strut applications, the universal clamp (page 27) should be used to clamp ExpressTray to strut using a bolt and spring nut (page 35).

- 01 Position “BAT” clip on outer wires of tray and opposing sides of the strut flanges.
- 02 To install, just hook one wing under the strut flange and push down the other wing with your thumb to slip it under the strut flange.
