# Mini-Com® High Density Modular Patch Panels

## specifications

High density modular patch panels shall consist of a metal panel with molded front or rear snap-in faceplates. Patch panels shall accept all Mini-Com® Modules for UTP, STP, A/V or select fiber and shall mount to standard 19" racks. Patch Panels shall be available in 32-port (1 RU), 48-port (1 RU) and 72-port (2 RU). Flush mount panels shall be easy to identify with pre-numbered ports. Angled patch panels shall be designed at an optimum angle to help route the cable.

### technical information

Mounting options:	Mounts to standard 19" rack
Material:	Stamping is CRS and faceplate is ABS
Packaging:	Packaged with appropriate pre-installed snap in faceplates and a set of mounting screws (#12-24 and M6)

# kev features and benefits

Modular	Panels with front snap-in faceplates will accept any Mini-Com® Modules and panels with rear snap-in faceplate will accept all UTP, STP, A/V and most fiber modules				
Angled design	Minimizes the need for horizontal cable managers enabling patch cords to be routed directly into vertical cable managers which leads to increase closet density				
Port and panel identification	Pre-numbered ports and labeling capabilities on select panels				
Optional strain relief bars	To help support and manage cables				
Optional filler panels	Flat and angled design fill unused rack openings to provide a clean and consistent look when used with any version of Panduit patch panels				
Optional extender bracket	Allows 19" patch panels to be mounted on a 23" rack				
High density	More modules per rack space				

# applications

Mini-Com® High Density Patch Panels are ideal for multi-media applications. Flat and angled designs are available in various port densities to fit most needs. Flush mount style includes pre-numbered ports or area for adhesive labeling, select faceplate style panels with label pockets include pre-numbered labels and covers. Angled

patch panels are available for applications in which rack space is limited. The design allows cable to flow to each side of the rack, minimizing the need for horizontal cable managers and increasing the density of the rack space. High density patch panels can mount on a standard 19" rack or a 23" rack when using the extender brackets PEB1 or PEB2.
