PUT MORE WITHIN REACH

Introducing the first-of-its-kind GFCI USB Outlet.

THE GFCI USB OUTLET OFFERS:

Having it all doesn't have to be complicated. With the latest innovation from Legrand, superior safety and modern convenience are more accessible than ever before, with an all-in-one solution.

Designed to meet National Electrical Code requirements for ground fault protection, with less hassle than breaker box alternatives, this self-testing GFCI outlet lets you resolve trips right where they happen with just the push of a button. No delays, no confusion, no frustrating trips to the breaker box.

And, with its built-in USB connections – included for the first time in a GFCI outlet – this solution means you can now add mobile device charging anywhere, including kitchens and bathrooms, with greater speed and ease. No sacrificing preferred charger placement, or losing a plug to that bulky adapter.

Power, safety, charging – go ahead and put it all within reach, with Legrand.

Exclusive functionality.

The first, and only, solution of its kind on the market today.

Ultra-reliable ground fault protection.

Self-tests at an industry-leading rate of every 3 seconds, ensuring its always ready to protect.

Easy, accessible troubleshooting.
