

ITEM# 4010

1 Meter Heavy-Duty Aluminum Straight Edge - Metric

Choose the Empire® Level 1-Meter Heavy-Duty Aluminum Straight Edge for measuring metric-graduated cut lines squarely and precisely on surfaces up to 1000 millimeters long. The straight ruler consists of rust and corrosion-resistant extruded aluminum to keep its honed edge square and its measuring surface level. Measuring graduations in numeric millimeters and lined fractional millimeters are clearly stamped on the Empire Level 1-meter heavy-duty aluminum straight edge. The graduations are marked on each side of the ruler for easy straight-edge measurements. The Empire Level straight edge ruler is 1/8-inch thick, so it's sturdy enough for use as a saw or router-cut guide. Its two-inch width provides plenty of room to hold or clamp the guide in place for cuts. The Empire Level straight-edge measuring tool also has a hanging eyelet for vertical storage.

INCLUDES:

[\(1\) 1 Meter Heavy-Duty Aluminum Straight Edge - Metric \(4010\)](#)

FEATURES:

- Heavy-duty aluminum frame for strength
- Easy-reading inch-scale graduations, allowing measurements to be more accurate
- Heavy-duty aluminum straight edge – 2" width
- 1 year limited warranty
