

NEW!

Non-metallic Mounting Blocks for Siding

Provides Flat Mounting Surface on All Siding Types • Three Styles

EASY INSTALLATION ON INSTALLED SIDING

Available for three siding types, Arlington's one-piece, 5" x 7" non-metallic bases provide a smooth, flat mounting surface for equipment and devices.

They also help to meet NEC 2020 code compliance for A/C disconnects.

There's a mounting block for each siding type. And they're easy to install *after* the siding is up.

- MB5741 for 1/2" siding
- MB5751 for 5/8" siding
- MB5771 for Dutch Lap

NEW!

- Mounting block measures 5"w x 7"h
- UV-rated for long outdoor life
- Heavy duty, paintable plastic
- Drain hole keeps water and dirt from collecting on lower edge

- 1 Use flat head screw (not supplied) to position and fasten mounting block to siding.
- 2 Mount equipment to block with screws of sufficient size and length to pass through mounting block into sheathing/substrate.
- 3 Apply caulk, as required, on top and sides of mounting block.
