SPECIFICATION SERIES STANDARD FEATURES

| - Square Law Dimming | - Voltage compensation |
| :--- | :--- |
| - Power-failure memory | - Superior RFI suppression |
| - Captive linear slider | - Accessible air-gap switch |
| - Electrostatic discharge tested | - Precise color matching |
| - Heavy-duty components for surge protection and long product life |  |
| Lutron controls are rated at 120VAC, 60 Hz unless otherwise noted. |  |

- Square Law Dimming

Volage compensation

- Power-failure memory
- Accessible air gap switch
- Precise color matching
- Heavy-duty components for surge protection and long product life Lutron controls are rated at $120 \mathrm{VAC}, 60 \mathrm{~Hz}$ unless otherwise noted.

## PRODUCT FAMILY FEATURES

- The original smooth linear-slide dimmer
- Over 25 years of proven reliability in the most demanding applications
- Exclusive heat sink design maximizes convection cooling to maximize reliability
- Full family of products for most lighting sources
- Heavy duty components for surge protection and long product life
- Precise color matching across all controls

## DIMENSIONS

STANDARD COLORS/FINISHES
Matte Finishes (Ships in 3-5 days)
Add color/finish suffix to model number to order.
Example: N-600-WH
WH White

BE Beige
IV Ivory
GR Gray
BR Brown
BL Black
TP Taupe

## SPECIAL ORDER <br> MULTIGANG AND METAL WALLPLATES

Multigang and metal wallplates are available. When ordering product for use with metal wallplates, the product and wallplate must be ordered separately. See the Nova T~/Nova Wallplate Ordering Guide in the Lutron Residential Lighting Controls Catalog (360-975) for ordering procedure.
See below for complete list of metal finishes.

| Metal Finishes (Ships in 4-6 weeks) |  |  |
| :--- | :---: | :---: |
| SB | Satin Brass |  |
| BB | Bright Brass |  |
| BC | Bright Chrome |  |
| Special | Metal Finishes |  |
| QB | Antique Brass |  |
| QZ | Antique Bronze |  |
| SC | Satin Chrome |  |
| SN | Satin Nickel |  |
| BN | Bright Nickel |  |
| Anodized Aluminum Finishes |  |  |
| CLA | Clear Anodized Aluminum |  |
| BLA | Black Anodized Aluminum |  |
| BRA | Brass Anodized Aluminum |  |

DERATING／MAXIMUM CAPACITY FOR

Dimming with ON/OFF Control Using PP-120H/230H/277H/347H

* Red wires are interchangeable-either may be connected to line side or load side

## NOVA CONTROLS AND ACCESSORIES

## PART 1 －GENERAL

## 1．01 Summary

A．Scope：Provide，install and test all switches，dimmers and related devices as specified herein for the areas indicated on the drawings， specifications，and load schedules．
B．Related Sections：Section 16580 （Ballasts），Section 16570 （Dimming Systems）．

## 1．02 References

A．UL 1472，CSA，NOM，ISO 9001

## 1．03 System Description and Operation

A．Permanently installed，wallbox mounted switches and dimmers
B．Permanently installed，wallbox mounted fan－speed controls
C．Permanently installed，wallbox mounted receptacles
D．Permanently installed，wallbox mounted data，voice and cable jacks
E．Screwless，seamless wallplates

## 1．04 Submittals

A．Submit manufacturer＇s standard catalog data giving all application， wiring，and installation information on basic components and wallplate kits．Provide test data and／or samples as required to demonstrate conformance with PART 2 of this specification．

## 1．05 Quality Assurance

A．Manufacturer shall have a minimum of 10 years continuous experience in manufacturing wallbox dimming products．
B．Dimmers shall be UL listed，CSA and NOM approved specifically for each required load（i．e．，tungsten，electronic low voltage transformer， magnetic low voltage transformer，and fluorescent）． Manufacturer shall provide file card or certificate upon request． Universal load－type dimmers shall not be acceptable．
C．Manufacturer shall maintain ISO 9001 certification and provide a copy of the certificate upon request．

## 1．06 Warranty

A．All devices shall be covered by a minimum one－year warranty．

## PART 2 －EQUIPMENT

## 2．01 Acceptable Manufacturers

A．Lutron Electronics Co．，Inc．
B．Unless otherwise noted，all basic components（dimmer，receptacle， telephone jack and cable TV jack）and wallplate kits shall be provided by one manufacturer．

## 2．02 Equipment

A．Controls Lutron Nova Style
1．Performance
a．Dimmers shall provide full－range，continuously variable control of light intensity．
b．Controls shall fit a 1 inch wide， 1.5 inch tall wallplate opening with a vertical linear－slide．Unless otherwise specified，controls shall have a matte finish．
c．Controls shall provide a vertical slider allowing the light level to be set by the user．＂Slide－to－off＂controls shall use the vertical linear－slide to turn the control on and off．＂Preset＂ dimmers shall provide the on／off function independent of the dimmer slider position．This preset function shall be provided as a push on／push off switch integral to the slider． For preset dimmers，when the lights are on，the slider shall change the light level and when the lights are off，the slider shall preselect the light level the lights will turn on to．
d．Control on／off function must be accomplished utilizing a mechanical air－gap switch to totally disconnect power from the load during＂off＂condition，no leakage current shall be present at the fixture（s）．
e．Slider shall be captured behind wallplate．
f．Preset dimmers shall be capable of multi－location on and mechanical air－gap off using standard 3 －way and 4 －way switches．
g．Controls shall be able to have their visible plastic parts replaced，for color changes in the field，without removing the body of the control from the wall and with requiring special tools．
h．Within rated capacity，dimmers shall be available for direct control of incandescent，electronic low voltage，magnetic low voltage，neon cold cathode，and fluorescent．
i．Controls shall be capable of operating at the rated capacity； this includes modified capacities for ganging configurations which require the removal of fins．Operation at rated capacity shall be possible across the full ambient temperature range，without shortening design lifetime．
j．Dimmer shall provide smooth and continuous Square Law dimming curve，for the full slider travel，on their rated load per The IESNA Lighting Handbook，9th edition，p．27－4．
k．Controls shall meet the applicable requirements of UL 20 and UL 1472 referring to the inclusion of a visible，accessible air－gap off switch and the limited short circuit test．
I．Controls shall meet ANSI／／EEE Std．C62．41－1980，tested to withstand voltage surges of up to 6000 V and current surges of up to 200 A without damage．
m ．Dimmers shall be designed to reduce interference with radio，audio，and video equipment．
n．Controls shall incorporate power－failure memory．Should power be interrupted and subsequently returned，the lights or fans will come back on to the same levels set prior to the power interruption．Restoration to some other default level is not acceptable．
0．Controls shall not be susceptible to damage or loss of memory due to static discharge．
p．Dimmer shall include voltage compensation to compensate light output for variation in the AC line－voltage．Dimmers in which the light output is not held constant with varying AC line－voltage shall not be acceptable．
q．Controls shall operate in an ambient temperature range of $0^{\circ} \mathrm{C}\left(32^{\circ} \mathrm{F}\right)$ to $40^{\circ} \mathrm{C}\left(104^{\circ} \mathrm{F}\right)$ ．
r．3－Way controls shall wire using conventional 3－way and 4－way wire runs．
s．Contractors shall install all backboxes with a minimum wallbox depth of 2.5 inches．
2. Incandescent Dimmers
a. Provide incandescent dimmers for direct control of up to 2000 watts.
b. Dimmers shall have a high-end of no less than $95 \%$ of line voltage.
c. Dimmer shall be capable of operating in either 3-way switch location.
3. Electronic (Solid-State) Low Voltage (ELV) Transformer Dimmers
a. Provide ELV dimmers for direct control of up to 450 watts of electronic low voltage load.
b. Dimmers shall contain circuitry specifically designed to control the input of electronic (solid state) low voltage transformers. Dimmers using standard phase control shall not be acceptable.
c. Dimmers shall have a resettable overload protection that automatically shuts off when dimmer capacity is exceeded. Protection methods that are non-resettable or require the device to be removed from the wall to reset shall not be acceptable.
d. Dimmers shall be designed to withstand a short, per UL 1472 section 5.10 , between load hot and either neutral or ground without damage to the dimmer.
e. Dimmers shall have a high-end of no less than $90 \%$ of line voltage.
4. Magnetic Low Voltage (MLV) Transformer Dimmers
a. Provide MLV dimmers for direct control of up to 2000 VA of magnetic low voltage load.
b. Dimmers shall contain circuitry specifically designed to control and provide a symmetrical AC waveform to the input of magnetic low voltage transformers per UL1472 section 5.11.
c. Dimmers shall not cause a magnetic low voltage transformer to operate above the transformers rated operating current or temperature.
d. Dimmers shall have a high-end of no less than $95 \%$ of line voltage.
e. Dimmer shall be capable of operating in either 3-way switch location.
5. Fluorescent Dimming Ballast Dimmers
a. Provide Fluorescent dimmers for direct control of fluorescent dimming ballasts up to the manufacturers specified rating.
b. Dimmers shall be designed to operate the following ballasts. Dimmers and ballasts shall be produced by the same manufacturer to ensure proper ballast/control compatibility:

1) Hi -lume ${ }_{\odot}$ Architectural Dimming Ballasts (1\% 3-wire)
2) Hi-lume ${ }_{\odot}$ Compactrm Lamp Dimming Ballasts (5\% 3-wire)
3) Eco-10т Lighting Management Dimming Ballasts (10\% 3-wire)
4) Eco-10тm Lighting Management Dimming Ballasts ( $10 \% 0-10 \mathrm{~V}=-=$ )
5) Tu-Wire ${ }_{m}$ High Performance Dimming Ballasts (5\% 2-wire)
c. Dimmers shall be designed to provide full ballast output at high-end.
6. Remote dimming modules for high power loads
a. Where lighting loads exceed the full rated capacity of single dimmers, provide a Nova incandescent dimmer driving high power modules. High power module and dimmer shall be from the same manufacturer to ensure compatibility.
b. High power modules shall be remotely mounted.
c. High power module shall be rated and UL listed for control of incandescent, magnetic low voltage, electronic low voltage, fluorescent, and neon/cold cathode loads in increments of 2000 Watts up to 30,000 Watts.

### 2.03 Source Quality Control

A. All dimming controls shall be $100 \%$ function tested at the time of manufacture. Statistical sampling plan shall not be acceptable.

## PART 3 - EXECUTION

### 3.01 Installation

A. Contractor shall furnish all devices (dimmers, accessories, \& wallplate kits), labor and other services necessary for the proper installation of the devices as indicated on the drawings and specified herein.
B. Contractor shall be responsible for derating dimmer capacity if side sections are removed.
C. Contractor shall run separate neutral wires in $120 / 208 \mathrm{~V} \sim$ installations.
D. Devices shall be installed utilizing manufacturer's recommended application, wiring and installation instructions.
E. Contractor to provide seamless wallplate covers per specification 2.02 for all devices ganged in a common box. Contractor shall provide barriers within the box where required by code.

### 3.02 Field Quality Control

A. Twenty-four hours a day, seven days a week, global customer service and technical hotline available.
B. Supplemental information shall be provided by manufacturer's Internet site.
