

4 1/4" REMODLER IC FOR LED SCREW-IN MOUNTING SYSTEM INSTALLATION INSTRUCTIONS

IMPORTANT: READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE THE INSTALLATION.

WARNING: Risk of fire or electrical shock. Most dwellings built before 1985 have supply rated 60°C. Consult a qualified electrician before installing. This product must be installed in full accordance with applicable electrical and building codes.

To prevent electrical shock, make sure to turn off mainpower switch prior to the installation.

Note: This fixture is designed for installation where it may be in contact with insulation when used with a LED lamp.

INSTALLATION

1. Determine the position of the fixture and cut an opening using a mounting plate of appropriate diameter.
2. Open the junction box and pull the wires out for easy access. Insert the cable through the knock outs onto the junction box. Make the electrical connections using the wire to wire connectors supplied, and then replace the cover.
3. Insert housing onto the opening until the can is flush with ceiling.
4. Secure the housing into position using the integrated screws-in mounting system inside the can. (Can easily be unscrewed to remove the can and reach inside the ceiling if necessary, without damaging the ceiling.)
5. Insert the lamp (not supplied) into the socket and close the fixture using a trim adapted to your lighting needs.
