

SBL

LED Wraparound

Simple, Entry-Level Wrap Replacement

The SBL wraparound from Lithonia Lighting® is an affordable LED solution for general-purpose lighting. Choose from Contractor Select™ configurations when your budget or timeline is tight. If you need a wide range of lumen packages, configurations and control options, additional SBL configurations allow for a simple one-for-one replacement of an existing wrap with all the cost saving benefits of LED. SBL is perfect for closets, storage rooms, hallways and office spaces.

Configurable Options

- eldoLED® 1% dimming provides flicker-free 0-10V dimming. These advanced dimming capabilities save energy and prolong the life of the SBL.
- Pair the SBL with the LSXR occupancy sensor for additional energy savings. The LSXR can dim the SBL down to a low-level setting or turn it completely off based on occupancy.
- Integrated nLight® technology allows the fixture to communicate with nLight occupancy sensors, photocells and wall stations.
- Emergency battery packs can be integrated and feature an innovative Quick-Disconnect wiring harness to make field maintenance and upgrades quick and easy.

Key Features:

- Designed to replace existing 2-lamp T8 and T12 fluorescent
- Standard MVOLT (120-277V) driver
- Available CCTs: 3000K, 3500K, 4000K and 5000K
- SBL2 lumen package: 2000
- SBL4 lumen packages: 3000, 4000, 4800, 6000, 7200
- Delivers over 100 LPW consistently
- 90% LED lumen maintenance at 50,000 hours (L90/50,000)
