

Swidget Modular Smart Devices

Empower Smart, Healthy Homes

The quality of air inside a home is comprised of several factors, including humidity and the amount of volatile organic compounds (VOCs) present.

Pairing Swidget smart controls with Panasonic ventilation fans helps reduce harmful VOCs and allergens so you can protect a family's health and home.

Without IAQ Sensors, How Do You Know?

Your Health

Humidity and condensation from hot showers and baths can lead to airborne mould spores and mildew, both of which can be hazardous to your health. VOCs from many types of building materials can be inhaled, and ultimately damage organs and the central nervous system.*

Your Home

Condensation on windows and walls can lead to long-term structural weakening and damage to the home. This can create warranty issues and callbacks.

Breathe, feel, and live well

with the complete smart solution for indoor air quality

WORKING TOGETHER

Panasonic

Breathe confidently with air that is always fresh. Our Energy Recovery Ventilators and ventilation fans circulate fresh air to your indoor spaces and cycle out damp, stuffy air.

Swidget

Swidget Smart Controls detect unhealthy air and automatically control Panasonic's ventilation products, enabling it to remove the unhealthy or contaminated air. 24 hours a day, 365 days a year, you can rest assured that the quality of the air you're breathing is always fresh and healthy.

Swidget Smart Controls can be added to a wide range of Panasonic ventilation solutions to ensure you are breathing the highest quality air. Swidget has a variety of sensors that monitor motion, temperature, humidity and air quality.

Empower your home to ensure you are breathing clean, fresh air

Intelli-Balance™ Energy Recovery Ventilator

20/40/60 Timer Control Switch

Air Quality Sensor

Swidget can monitor your indoor air quality and turn on your ERV when you need it most to keep your air clean and fresh.

Empower your home to protect you from mould and mildew

WhisperGreen® Select Fan

20/40/60 Timer Control Switch

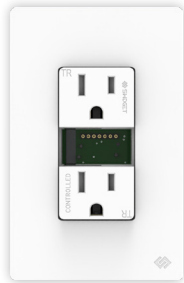

Temp/Humi/Motion Sensor

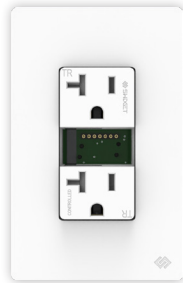

Set your fan to turn on automatically when Swidget detects the humidity levels are too high in your bathroom.
