

SIEMENS

Siemens Canada loadcentres

Features and benefits

Get the highest standard

Siemens Canada is proud to offer one of the highest quality, broadest and most flexible loadcentre lines in the industry. From single family to multi-family applications, Siemens can offer a high-quality, labour-saving loadcentre for your application.

Product overview

A loadcentre is a panel which distributes, protects and controls lighting and power circuits in residential and light commercial applications, including single family homes, townhouses, high-rise condominiums and small office buildings.

Typical part numbers start with SEQ, EQL, EQ3, EQ4, EQG, EQS or W.

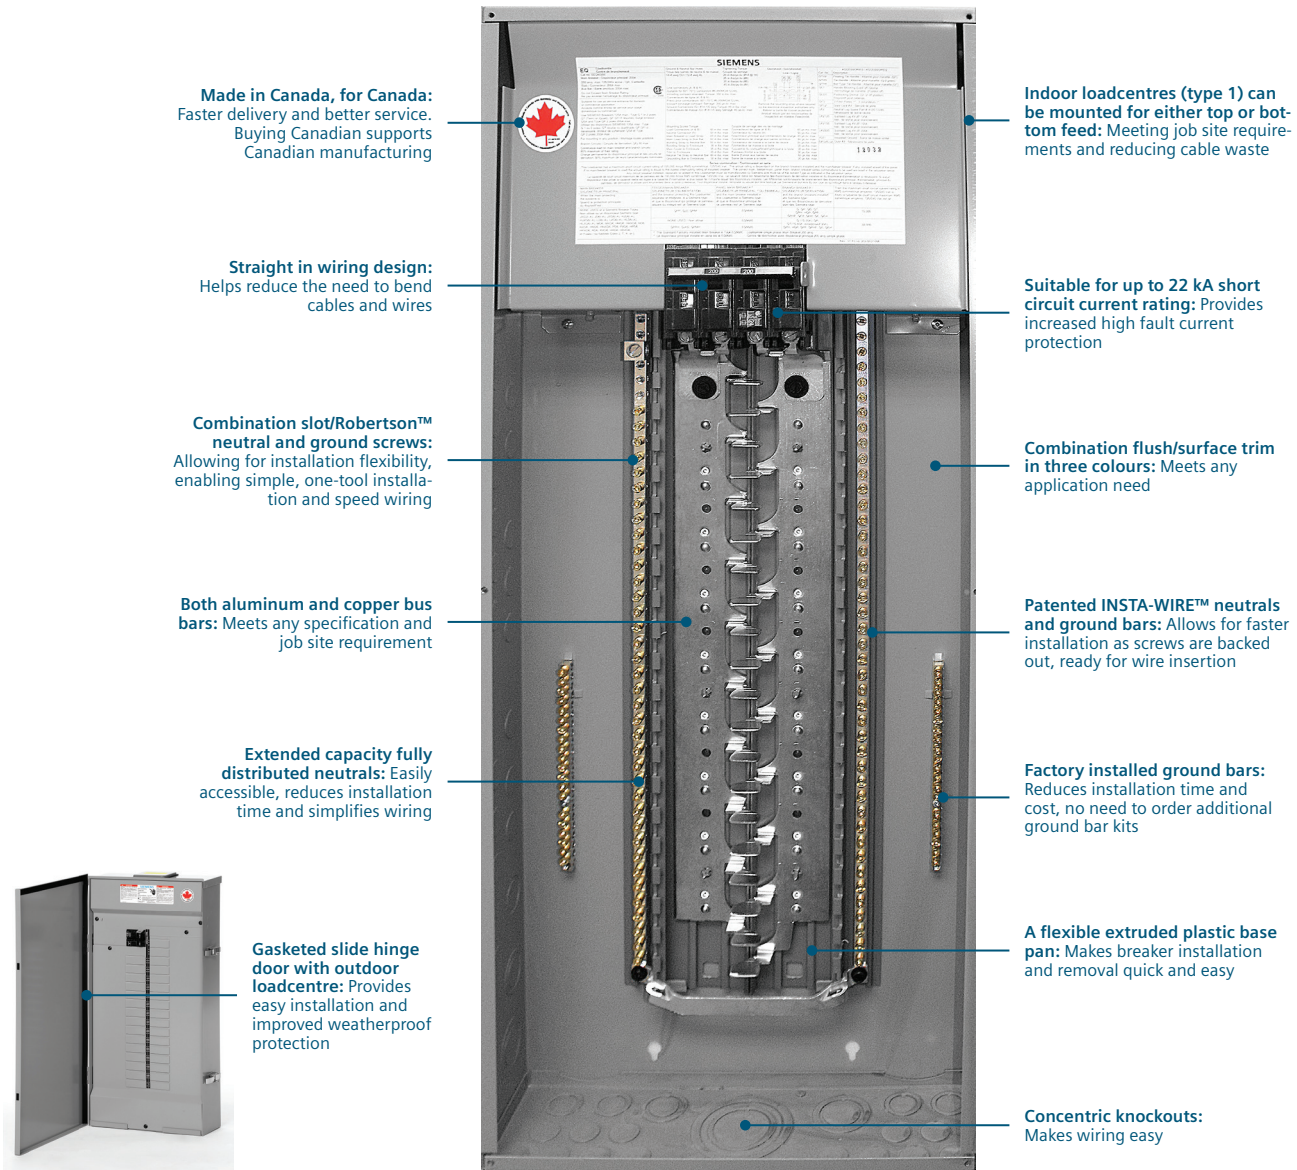

Typical users and target customer groups include primarily contractors, electricians, builders, home owners, and individuals.

The Siemens loadcentre product line provides a wide array of variation to meet any application need, including:

- Single and three phase
- 2/4 through 60/120 circuits
- 60 to 225 Amp
- Indoor and outdoor enclosure
- Combination flush/surface trims with optional doors in grey, white or beige colours
- Wide range of accessories
- Made in Canada, for Canada

Siemens Canada loadcentre

Features and benefits

Siemens provides the broadest product portfolio related to multi-family applications. Flexibility, innovation and quality are the hallmarks of Siemens products for multi-family applications providing the customer with unmatched value. One example is our quick-make quick-break circuit breakers which give homeowners peace of mind and fast acting circuit protection. Our whole house surge protection solutions, arc fault and ground fault circuit interrupters provide additional protection against the risks of electrocution, fire hazard and property damage. With the comprehensive selection of options and accessories, Siemens loadcentres and breakers are the smart choice for the conscientious customer.
