TABLE I. DIMENSIONS

## **WARNING**

To avoid electric shock, do not energize any circuits before all internal and external electrical and mechanical clearances are checked to assure that all assembled equipment functions safely and properly.

## INSTALLATION INSTRUCTIONS:

- 1. Check louver kit catalog number and make sure that the corresponding filter kit was selected.
- 2. Locate filter bracket mounting holes (4 or 6) if the louvers are stamped on the enclosure panel. Locations and dimensions are shown on figure 1 for each corresponding louver.
- Drill four or six holes if needed. When drilling holes, make sure that no wires or components are in the way of the drill bit.
- 4. Assemble bracket and filter as shown in figure 2.
