WARNING

Twisting or tipping cabinet set can cause serious injury or death, and product damage.

Minimize tipping by using recommended lifting bars that provide lifting points equidistant from ends of enclosure set.

CAUTION

Insecurely joined cabinets can come apart during lifting and can fall, causing bodily injury and product damage.

Ensure joining kit P2AJ or P2AJHF is properly installed between each enclosure to avoid product damage and bodily injury.

WARNING

Falling lifting bars can cause serious injury or death.

When not in use, lay lifting bars flat.

NOTICE

If warning labels become illegible or damaged, replace them with new labels.

To apply new labels, completely remove the old label and clean the surface of all adhesive. Apply the new labels to a clean, dry surface.

To receive additional WARNING labels, call 1-800-355-3560.

WARNING

Loose fasteners can cause cabinet(s) to fall and cause serious injury or death and product damage.

Torque fasteners to 30 FT-LBS.

Use screws and washers in kit to attach lifting bars at each required lifting position of the cabinet(s) top to help avoid serious bodily injury or death due to loose fasteners.
