

INSTALLATION INSTRUCTIONS

# Floor box, stamped steel and cast iron

664-SC, 664-S and 664-CI

## Steel City®

#### Caution:

 Product should be installed by a qualified electrician in accordance with national and local electrical codes.

#### Warning:

Risk of shock, disconnect power before installation.

This floor box is semi adjustable and must be adjusted prior to the concrete pour to meet final floor finish requirements.

An additional 3/4" adjustment is available when installing the cover.

- 1. Install leveling screws supplied and place box on firm support. (Figure 1).
- 2. Attach conduit in appropriate K.O. or tapped holes as required to meet wiring needs.

#### **Caution:**

- When using the center K.O.'s, the device panels must be installed prior to the conduit.
- 3. Level floor box to desired height using leveling screws and secure to form or ground.
- 4. Ensure temporary concrete cover is securely in place prior to pour.

### **Important**

Read and understand all instructions and safety information before use. Be aware of proper usage and potential hazards.

#### **ACTIVATION:**

- 1. Locate box in concrete and remove any concrete covering cap.
- 2. Remove concrete cover to expose inside of box.
- 3. Attach device(s) to selected panel(s), please see catalog for available panels, and install panel(s) in box.
- 4. Install all wiring and devices in accordance with National Electric Code and all local codes.
- 5. Attach 664-CST cover (ordered separately).
