eXtreme® CAT 6A UTP System

The eXtreme CAT 6A UTP System delivers exceptional electrical performance and superior flexibility to meet 10 Gigabit Ethernet requirements in any environment. Component-rated connectors, patch panels, and cords support applications from computer clusters to server rows and high-resolution video in data center, financial, medical, or other demanding applications. Best of all, Leviton offers a lifetime product and performance warranty on qualified Contractor Program member CAT 6A installations.

- Independently verified and guaranteed by Intertek (ETL) to exceed TIA-568-C.2 permanent link, component, and channel margins, and IEEE 10GBASE-T (802.3an) requirements, as well as the ISO/IEC 11801 2nd Ed. Class E_A standard
- Guaranteed permanent link electrical performance distances as short as 10 feet, with approved cable
- Triple-stage compensation enhances permanent link and channel margin performance and augments alien crosstalk (AXT) suppression
- AXT field testing not required
- Backward compatible with CAT 6, 5e, and 5 systems
- Provides a seamless migration path to 10GBASE-T performance to maximize return on investment

EXTREME 6A QUICKPORT® CONNECTORS (see page A9)

All eXtreme 6A connectors deliver ease-of-use and superior performance:

- Patented dual-layer T568A/B label with larger wiring diagrams
- Patented Cone of Silence® helps suppress AXT
- Pair Separation Towers ease conductor separation
- Patented Retention Force Technology (RFT) protects against damage from four- or six-pin plugs

eXtreme 6A component-rated UTP connectors add several exclusive performance-enhancing features:

- Exceed all TIA-568-C.2 component requirements
- Metalized body helps suppress AXT
- Patent-pending triple-stage compensation enhances margin performance and augments AXT suppression
- Conductor retention feature holds wires during termination

EXTREME® CAT 6A PATCH PANELS (see pages A39-A44)

- Exceed all TIA-568-C.2 component requirements
- Inline IDC fields are consistent with 110-style panel designs
- Separated blocks provide room to work with larger CAT 6A cables and help to identify first pair position
- Patent-pending isolation gap on circuit board minimizes AXT between ports
- Conductor retention feature keeps pairs in place during termination
- Pair Separation Towers facilitate separation of conductors
- CAT 6A-compatible QuickPort® modular patch panels are available in standard metal or new C1 Ultra™ composite construction.

EXTREME CAT 6A PATCH CORDS (see page A55)

- Exceed all TIA-568-C.2 component requirements
- FTP construction provides excellent AXT suppression
- Strain relief boot ensures long-term network performance
- SlimLine plug profile reduces congestion in higher density applications
- Snagless design prevents tab breakage during moves, adds, and changes
- Stranded 26-gauge construction provides maximum flexibility

EXTREME CAT 6A 110-STYLE WIRING BLOCK KIT (see page A48)

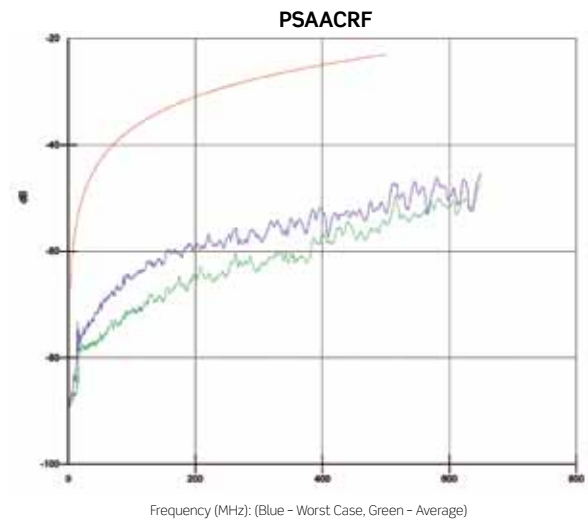

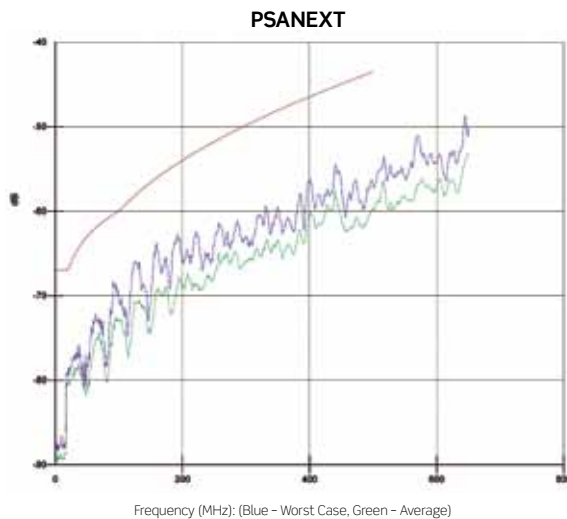

- Supports high-frequency data signals up to 500MHz
- Can be used as a consolidation point (CP) in a TIA-defined 90-meter permanent link

CAT 6A ALIEN CROSSTALK SHORT PERMANENT LINK (10 FT.) PERFORMANCE

eXtreme® 6+ CAT 6 UTP System

Choose eXtreme 6+ for craft-friendly installation and outstanding CAT 6 performance. Exceptional headroom above CAT 6 requirements provides no-risk performance for a variety of critical applications.

- Independently verified to exceed TIA-568-C.2 CAT 6 requirements for channel and component-level performance and ISO/IEC 11801 2nd Ed. Class E requirements
- Optimized for maximum throughput and a zero bit error rate for reliable transmission
- Guaranteed channel margin with approved cable

EXTREME 6+ CAT 6 QUICKPORT® CONNECTORS (see page A10)

- Patented Retention Force Technology (RFT) protects tines from damage from 4- or 6-pin plugs
- Pair Separation Tower design facilitates separation of conductors
- Patented dual-layer wiring label simplifies punchdown and reduces rework
- Increased wire retention reduces tine contact failure caused by cable stress and fatigue
- Gas-tight connection at the IDC prevents corrosion
- 110-style rear termination field for easy termination when installed in a wallplate or panel
- Available in QuickPack® or eco-friendly GreenPack™ bulk packs

EXTREME 6+ CAT 6 PATCH PANELS (see pages A39-A44)

- Patented Retention Force Technology (RFT) protects tines from damage from 4- or 6-pin plugs
- Universal T568A and T568B wiring cards for 110-style IDC terminations
- TIA-606 compliant labeling for easy port identification
- More than fifteen 110-style, QuickPort®, and C1 Ultra™ composite flat and angled options to meet any application needs

EXTREME CAT 6 PATCH CORDS (see page A56)

- Component-rated for optimal channel performance
- Stranded 24-gauge wire ensures sufficient flex life and long-term integrity
- Standard booted and SlimLine plug options
- SlimLine profile reduces congestion in higher density applications
- Snagless boot design prevents tab breakage during moves, adds, and changes
- Strain relief boot ensures long-term network performance

EXTREME® 6+ CAT 6 110-STYLE WIRING BLOCK (see page A48)

- 96- and 288-pair wall-mount options
- 96-, 192-, and 288-pair rack-mount options
- Can be used as a consolidation point (CP)

EXTREME® 6+ CAT 6 UTP SYSTEM

DESCRIPTION	PART NO.

CAT 6+ PSACR, 100 METER CHANNEL

Frequency: Red = TIA Limit Line, Blue = Worst Case, Green = Average
 Note: Representative worst-case power sum attention to crosstalk ratio (PSACR) in a 4-connector, 100-meter channel per TIA-568-C.2 CAT 6 standard with approved horizontal cable.

GigaMax® 5e+ CAT 5e UTP System

- Guaranteed to exceed TIA-568-C.2 and ISO/IEC 11801 2nd Ed. Class D CAT 5e requirements for channel and component level performance
- Guaranteed channel performance with approved cables

QUICKPORT® GIGAMAX 5E+ & 5E UTP CONNECTORS (see page A10)

Leviton offers two CAT 5e connectors, the GigaMax 5e+ and GigaMax 5e. Both provide 1000BASE-T performance for high-bandwidth applications. Connectors are available individually or in QuickPack® or eco-friendly GreenPack™ bulk packs. GigaMax CAT 5e+ connectors include exclusive performance-enhancing features:

- Component-rated for optimal channel performance
- Patented Retention Force Technology (RFT) protects tines from damage from 4- or 6-pin plugs
- Pair Separation Towers facilitate quick, effective termination
- Patented dual-layer wiring label simplifies punchdown and reduces rework

GIGAMAX CAT 5E+ PATCH PANELS (see pages A39-A44)

- Patented Retention Force Technology (RFT) protects tines from damage from 4- or 6-pin plugs
- Universal T568A and T568B wiring cards for 110-style IDC terminations
- TIA-606 compliant labeling for easy port identification
- More than 15 models to meet any application needs

GIGAMAX CAT 5E PATCH CORDS (see page A56)

- Component-rated for optimal channel performance
- Stranded 24-gauge wire ensures sufficient flex life and long-term integrity
- Standard booted and congestion-reducing SlimLine plug options
- Snagless boot design prevents tab breakage during moves, adds, and changes
- Strain relief boot ensures long-term network performance

See page A49 for our broad selection of CAT 5e 110-style wiring blocks and accessories.

Shielded CAT 6A/6/5e Systems

- Each system independently tested and verified to meet TIA-568-C.2 channel requirements
- Offers a high-level of security for networks in government, healthcare, financial, gaming, and other sensitive environments
- Superior protection from electromagnetic interference (EMI) and radio frequency interference (RFI)
- Compatible with F/UTP, U/FTP, and other common shielded cable types

SHIELDED CAT 6A/6/5E CONNECTORS (see page A12)

- Robust die-cast housing
- Unique design requires no punchdown tool
- 270° hinge for easy access and termination
- CAT 6A connectors meet TIA-568-C.2 channel requirements

SHIELDED PATCH PANELS (see pages A41 & A43)

- Meet TIA-568-C.2 and FCC part 68 requirements
- Stainless steel “comb” maintains consistent ground path between connector and panel
- 24-port 1RU and 48-port 2RU flat and angled profiles
- Accept all QuickPort® Connectors

SHIELDED CAT 6A/6/5E PATCH CORDS (see page A56)

- Cable construction provides data security and EMI/RFI protection
- Stranded conductors provide longer flex life
- Snagless boot design prevents tab breakage during moves, adds, and changes
- Strain relief boot ensures long-term network performance

WORK AREA

FEATURED PRODUCTS

CAT 6A Component-Rated Connectors **A9**

GreenPack™ Eco-Friendly Packaging **A11**

CAT 6A Shielded Connectors **A12**

Deliver voice, data, audio, and video to the desk, the conference table, the classroom, or the lab with Leviton's work area products. Solutions include QuickPort® category-rated and A/V connectors, wallplates, surface-mount boxes, and the front-loading Multimedia Outlet System (MOS), as well as standard telephone and video wallplates, all color-matched to Leviton's lighting and electrical control products.

QUICKPORT

Experience QuickPort - Leviton's innovative system of mix-and-match components. Wallplates, patch panels, surface-mount boxes, and a host of connectors including CAT 6A/6/5e, fiber, and A/V are all part of the QuickPort system. All components feature the same footprint, so any QuickPort unit can house any QuickPort connector. In addition, all components offer snap-in connection and interchangeability.

PAIR SEPARATION TOWERS

Separating wire pairs properly for punchdown can be a painstaking procedure. Leviton's Pair Separation Tower technology makes the process effortless. Included in all eXtreme® 6A, eXtreme 6+, and GigaMax® 5e+ connectors, the towers make termination quick and easy by physically separating each wire pair with a small, pointed tower.

DUAL-LAYER CONNECTOR LABELS

Work area installations are complicated enough. Leviton's patented connector wiring-scheme labels make field termination faster and easier. Instead of a single, heavily detailed schematic, our labels now feature easy-to-read double-layer diagrams. The top layer shows the T568B configuration for commercial installations. Peel back the easy-lift label to access the residential T568A schematic. No more eyestrain or mistakes from misreading.

RETENTION FORCE TECHNOLOGY (RFT)

Leviton's Retention Force Technology (RFT), found in all eXtreme 6A, eXtreme 6+, and GigaMax 5e+ connectors, provides unequalled durability and reliability for demanding applications. Its key feature, the patented polymer spring, supports tines and increases their resiliency. Even when 4- or 6-pin plugs are inserted, the spring returns tines to their pre-stress positions and protects against damage, saving on costly repairs.

QUICKPORT CAT 6A UTP CONNECTORS

eXtreme® CAT 6A connectors include several features that deliver ease-of-use and superior performance:

- TIA-568-C.2 performance up to 500MHz to support 10GBASE-T networks
- Independently tested and verified by Intertek (ETL) to meet all TIA permanent link and channel requirements
- Patented dual-layer T568A/B label with larger wiring diagrams
- Patented Cone of Silence® helps suppress alien crosstalk (AXT)
- Patented Retention Force Technology (RFT) protects against damage from four- or six-pin plugs
- Pair Separation Towers ease conductor separation
- Backward compatible with CAT 6, 5e, 5, and 3 installations

eXtreme CAT 6A component-rated UTP connectors include all the above, plus several exclusive performance-enhancing features:

- Guaranteed to surpass TIA-defined “6-around-1” alien crosstalk (AXT) testing parameters
- Metalized body helps suppress AXT
- Patent-pending triple-stage compensation enhances margin performance and augments AXT suppression
- Conductor retention feature holds wires during termination

All Leviton Category-Rated and USOC Connectors are RoHS Compliant

QUICKPORT CAT 6A UTP CONNECTORS	
DESCRIPTION	PART NO.

SPOTLIGHT High Frequency Performance

TIA-568-C.2 defines CAT 6A performance up to 500 MHz, twice the performance of CAT 6 (250 MHz). However, with this higher frequency comes significant electrical performance challenges. To counter these and enhance permanent link and channel performance, Leviton has designed and engineered a CAT 6A connector with patent-pending triple-stage compensation. An advanced rigid circuit board design, engineered tine geometry, and a flexible circuit provide compensation to minimize the adverse effects of critical TIA performance parameters, including near end crosstalk (NEXT), return loss (RL), and alien crosstalk (AXT).

COPPER
work area

EXTREME® 6+ CAT 6 CONNECTORS

- Patented Retention Force Technology (RFT) protects tines from damage from 4- or 6-pin plugs
- Pair Separation Tower design facilitates separation of conductors
- Patented dual-layer wiring label simplifies punchdown and reduces rework
- Increased wire retention reduces tine contact failure caused by cable stress and fatigue
- Gas-tight connection at the IDC prevents corrosion
- 110-style rear termination field for easy termination when installed in a wallplate or panel
- Available in QuickPack® or eco-friendly GreenPack™ bulk packs

QUICKPORT® 5E+ & 5E UTP CONNECTORS

Leviton offers two CAT 5e connectors, the GigaMax® 5e+ and 5e. Both provide 1000BASE-T performance for high-bandwidth applications. Connectors are available individually or in QuickPack or eco-friendly GreenPack bulk packs.

GigaMax CAT 5e+ connectors include exclusive performance-enhancing features:

- Component-rated for optimal channel performance
- RFT protects tines from damage from 4- or 6-pin plugs
- Pair Separation Towers facilitate quick, effective termination
- Patented dual-layer wiring label simplifies punchdown and reduces rework

SPOTLIGHT Termination Tools

PALM TERMINATION TOOL

Use Leviton's Palm Termination Tool to quickly and easily punch down connectors at the jobsite. This new tool, designed with contractor input, offers an ergonomic comfort grip, increased connector stability, and integrated holes that allow rack mounting of the Palm Tool for QuickPort panel terminations. The Palm Tool is compatible with all CAT 6A/6/5e and standard QuickPort A/V connectors. Order part number 47615-PTT or see page A78 for more information.

SPOTLIGHT Multi-Packs

QUICKPACK®

Save time and reduce packaging waste on large installations with QuickPack, Leviton's original bulk quantity connector package. With the recloseable and easy-to-store bag, unused product can easily be saved until needed. Each QuickPack bag contains 25 connectors and a minimum of 27 stuffer caps. QuickPack is available in eXtreme® 6+, GigaMax® 5e+ and 5e, and a wide variety of colors.

GREENPACK™

GreenPack, Leviton's newest patent-pending connector bulk pack, combines the efficiency of a multi-pack with the convenience of individual compartments. The eco-friendly container speeds installation time by reducing product handling, enabling instant inventory assessment, and minimizing packaging disposal. Each GreenPack contains 24 connectors, and is available in eXtreme 6+, GigaMax 5e+ and 5e category ratings in five colors.

Deliver the high-quality signals that are expected from today's latest technology with the Leviton line of audio/video (A/V) connectors and adapters. The modular system approach permits cost-effective custom applications while providing outstanding signal quality.

A/V CONNECTORS & ADAPTERS

- Includes Decora® and QuickPort® styles
- Connectors and adapters for standard and high definition (HD) signals
- Solutions for numerous types of multimedia equipment
- Applications for home theater, classroom, and enterprise installations
- Multiple termination styles for wiring options
- Colors match to Leviton's lighting and electrical control products

SPOTLIGHT | A/V Configurations

Leviton's Decora and QuickPort systems offer compact, centralized connectivity for multimedia devices including A/V equipment. The customized wallplates and inserts provide "all-in-one" wiring solutions for multiple display and source devices. Configurations can be tailored for commercial and residential applications including laptops, projectors, HDTV and satellite, DVD, and stereo and gaming equipment.

COMPRESSION, CRIMP-ON, & TWIST-ON RCA & F-CONNECTORS

Leviton’s compression, crimp-on, and twist-on connectors are ideal for more specialized A/V applications. Compression connectors, available stand-alone or with QuickPort® housings, offer an airtight seal and secure fitting for increased cable retention. Crimp-on and twist-on connectors are an economical solution for less demanding applications.

RCA CONNECTORS

- RCA compression connectors include six color rings for signal identification
- RCA compression connectors offer high-quality installations using RG-6 Quad Shield cable

F-CONNECTORS

- Compression F-connectors offer high-quality installations using quad shield cable
- RG-6 connectors available in one- and two-piece twist-on and crimp-on styles

COPPER

work area

The innovative Multimedia Outlet System (MOS) consists of a surface-mount box and single- and dual-gang wallplates which accept a variety of copper, fiber, and A/V connectors. The system is ideal for multiple media applications in conference rooms, training rooms, classrooms, auditoriums, and other areas.

MULTIMEDIA OUTLET SYSTEM (MOS)

- Modules are available in 0.5, 1, 1.5, and 2 unit high sizes
- Surface-mount housings accept 1 unit high modules only
- Plates accept 3 units high total
- Front-load installation ensures simple moves, adds, and changes
- Accommodates a combination of QuickPort® connectors and larger A/V components such as 3-port composite/component RCA and HD-15 Connectors
- Allows for flexibility in applications where deployment of a variety of voice, data, audio and visual systems is needed
- Dual-gang plate accepts complete set of combinations
- Fiber optic MOS products shown on pages B57-B58

SPOTLIGHT MOS Configurations

Plates shown fitted with 1 unit high modules.

The MOS system is designed for customized combinations of voice, data, audio, and video connectivity. Each single-gang wallplate or housing accepts up to three modules, combining both standard QuickPort and other specialized styles. Adapters come in a variety of signal formats including SVGA, component and composite video, and a wide mixture of RCA and 3.5 mm for audio applications. Blank inserts are also available to create a finished look when building in extra capacity for future growth.

COPPER
work area

QUICKPORT SURFACE-MOUNT HOUSINGS & BACK BOXES

- Surface-mount housings and back boxes work in places where it may not be practical to add a wallbox
- Housings mount with the included double-sided tape or screws, modular furniture brackets (page A24), or with magnets
- Surface-mount housings and back boxes have breakouts to match common surface-mount raceway systems
- 4S089 products are designed to work with Leviton shielded or eXtreme® CAT 6A connectors to allow proper bend radius control

DESCRIPTION				PART NO.
[L] Set of 4 Magnets, 1.00"H x 0.84"W x 0.30"D				41030-SMJ

Use one magnet for 2-port surface-mount housing. Use two magnets for 4-, 6-, and 12-port surface-mount housings and single- and dual-gang surface-mount back boxes. See color swatches on page A24.

FACEPLATES

- QuickPort® modular furniture faceplates accept all QuickPort connectors and snap easily and snugly into standard modular furniture
- Front-load installation of module ensures simple moves, adds, and changes without removing the furniture channel cover
- Faceplates are cULus Listed

BRACKETS

- Modular furniture brackets are used to install QuickPort surface-mount boxes or faceplates with back boxes in many types of modular offices
- Brackets are made from cold-rolled steel, and snap securely into modular partitions
- A cutout allows rear cable entry for a clean, uncluttered look and tangle-free installation

2- & 4-Port Standard Depth Modular Faceplate

4-Port Extended Depth Modular Faceplate

Herman Miller 2- & 4-Port Modular Faceplate

Standard modular furniture faceplates above fit openings of approximately 1.38" x 2.63" (1 3/8" x 2 5/8").

4-port Extended Plate provides 1/2" added depth (3/4" total) for installation into shallow raceway channels, e.g. some powered channels.

Herman Miller faceplates above fit openings of approximately 1.88" x 2.98" (1 7/8" x 2 7/8").

Standard and extended depth faceplates are compatible when used with Herman Miller G1189A Reducer available from Herman Miller dealers.

DURAPORT CONNECTOR HOUSING

- Twist-lock mating allows for easy installation and provides a robust seal
- Compatible with eXtreme® 6+ and GigaMax® 5e+ QuickPort® connectors
- Captive connector cap with retainer protects and seals unused ports

DURAPORT STAINLESS STEEL WALLPLATE

- Patent-pending over-molded gasket on wallplates provides a watertight fit
- Compatible with standard NEMA boxes

DURAPORT OUTLET KIT

- For added convenience, DuraPort components are packaged together
- DuraPort Kits include connector housing, connector cap, and stainless steel wallplate
- Patch cords and QuickPort connectors are sold separately

DURAPORT PATCH CORDS

- Available in industrial plug to industrial plug, and industrial plug to RJ 45 plug configurations
- Patch cords are CAT 6 rated

SPOTLIGHT Industrial Wallplate Design

The DuraPort industrial wallplate is manufactured with a patented industry-first, over-molded gasket. The gasket seals not only the edge of the plate where it meets the wall, but also extends behind each mounting screw hole for a complete seal without the need for conventional O-rings. The integrated wallplate and gasket, in addition to providing exceptional sealing, also help to position and retain screws during installation, so the wallplate aligns perfectly and seats flush every time.

For voice and data applications outside of North America, Excella Series wallplates offer the convenience and flexibility of QuickPort® connectivity for British Standard UK-style electrical boxes. Excella QuickPort wallplates are compatible with all QuickPort connectors; choose from category-rated UTP, shielded, A/V, or fiber connectors.

All Excella wallplates feature overall dimensions of 86 mm x 86 mm and a mounting hole distance of 60.3 mm. They are designed for installation in electrical boxes conforming to British Standards BS 4662 for flush-mount electrical boxes and BS 5733 for surface-mount electrical boxes. Choose an optional colored frame when your application calls for a distinctive aesthetic. With eight decorator colors available, you are certain to find the perfect balance between functionality and flair.

In addition to the QuickPort products, the Excella Series includes a wide range of electrical wiring devices, including switches, sockets, dimmers, and passive infrared (PIR) occupancy sensors. Ask your Leviton distributor or representative for more information.

WORK AREA | Decora® Wallplates

COPPER

work area

Standard Decora and Decora Plus wallplates accept a variety of inserts for voice, data, and video applications. The most common wallplates are shown here in a variety of materials and dimensions. Refer to page X10 for more detailed material properties. Decora Plus wallplates utilize a screwless design. Numerous additional configurations are available; call 1.800.722.2082 or visit leviton.com for more information.

PATCH PANELS

FEATURED PRODUCTS

New C1 Ultra™ Composite Patch Panels **A39**

New CAT 6A 110-Style Patch Panels **A40**

New 1RU 48-Port QuickPort® High-Density Angled Panel **A43**

Choose Leviton for all your patch panel needs. We continuously develop new high-quality panels to provide you with the latest technology and ideal configuration for your unique applications. Our newest style is the Leviton C1 Ultra™, the industry's only panel constructed of ultra-strong, ultra-durable composite materials. The CAT 6A 110-style panel offers an inline IDC field and is the first in the industry to receive ETL's component rating. Shielded panels, the patented Zero-U Verti-GO®, die-cast high-density panels, recessed panels for close quarters, and two styles of angled panels round out the industry's largest selection of patch panels.

Flat 48-Port

COMPOSITE FLAT PATCH PANELS | A39

Leviton C1 Ultra™ panels have the same profile as standard metal panels, but feature polymer composite construction, ideal for data centers and other showroom-style environments. Composite panels include rear cable management bars and integrated front cable managers.

Available Styles: [110-Style](#) | [QuickPort®](#) | [Blank](#)

Flat 48-Port

High-Density 48-Port

STANDARD FLAT PATCH PANELS | A40-A41

Traditional flat profile works well in almost any application. All flat panels include rear cable management bars.

Available Styles: [110-Style](#) | [QuickPort](#) | [Shielded](#)

Recessed-Flat 48-Port

RECESSED-FLAT PATCH PANELS | A42

Designed primarily for data center cabinet applications, this panel will work in any application where minimal depth in front of the panel is a requirement.

Available Styles: [110-Style](#) | [QuickPort](#)

Angled 48-Port

ANGLED PATCH PANELS | A43

Recommended for use in racks to optimize patch cord management and rack space utilization.

Available Styles: [110-Style](#) | [QuickPort](#) | [Shielded](#)

Recessed-Angled 48-Port

RECESSED-ANGLED PATCH PANELS | A44

Ideal for applications in which rack space optimization, patch cord management, and a low profile appearance are required. This panel is suitable for either rack or cabinet installations.

Available Styles: [110-Style](#) | [QuickPort](#)

VertiGO Zero-U

ZERO-U PATCH PANELS | A45

VertiGO® panels are recommended for use in data center cabinets, or for any application that needs connectivity outside of the traditional 19" rack space. Vertical channel models provide cable routing and protection.

Available Styles: [QuickPort](#) | [Opt-X®](#)

FLAT C1 ULTRA COMPOSITE 110-STYLE AND QUICKPORT® UTP PANELS

- Made from high-tech composite materials for a look unique in the patch panel market
- 10% stronger than standard 16-gauge metal patch panels, providing added support during termination
- Aesthetic design and customizable face make panels ideal for showroom-style environments
- Panel face can be customized to feature any design, color, or logo
- Available in 48-port 2RU QuickPort and 110-style models
- Panels include two integrated patch cord managers that attach directly to the face of the panel, saving up to 50% of valuable rack space
- Patch cord managers prevent cables from obstructing view of port numbers
- Panels also include two rear cable management bars
- Clear label holders create a window to easily view port numbers and custom designs
- Panel is 100% recyclable
- Complements the look of Opt-X Ultra® (page B7) and Versi-Duct® cable management (page A69)

AVAILABLE CABLE MGMT.:

- Versi-Duct®
- Rear Cable Mgmt. Bars
- Horizontal Cable Managers
- Blank Filler Panels
- VELCRO® Brand Fasteners

See pages A69-A76 for product details and ordering information.

Front & Rear Managers are included with all C1 Ultra panels.

RoHS All Leviton CAT 6A/6/5e Patch Panels are RoHS Compliant

SPOTLIGHT Customizing Leviton C1 Ultra Patch Panels

Create customized panels with the colors, images, and functionality that best fit your application's needs. From school colors or corporate logos to A/B switch fabric or connectivity identification, the C1 Ultra helps enhance data center and telecom room organization and aesthetics. It's as easy as 1-2-3:

1. Go to leviton.com/c1ultra to request a quote and download a blank artwork template with easy step-by-step instructions.
2. Upload your newly created artwork to Leviton's FTP site (address will be provided upon completion of the quote).
3. Once the artwork has been uploaded, a Leviton make-to-order specialist will provide you with a proof, and then upon approval, create your panel.

FLAT 110-STYLE COMPONENT-RATED UTP PANELS

- 1RU 12- or 24-port, 2RU 48-port, and 4RU 96-port configurations
- Available in CAT 6A, 6, and 5e
- Six-port RJ-45 modules on front, and 110-style punchdowns on rear
- Includes color codes for T568A/B wiring schemes
- CAT 5E and 6 include 25-pair wiring schemes
- Rear cable management bar included with panels (one bar per 24 ports)
- CAT 6A panels include magnified label holders for easy reading
- Silkscreened port numbers and paper label holders included
- Independently tested and verified by Intertek (ETL) to meet all TIA component, permanent link, and channel requirements

RoHS All Leviton CAT 6A/6/5e Patch Panels are RoHS Compliant

AVAILABLE CABLE MGMT.:

- Versi-Duct®
- Rear Cable Mgmt. Bars
- Horizontal Cable Managers
- Blank Filler Panels
- VELCRO® Brand Fasteners

SPOTLIGHT CAT 6A Component-Rated 110-Style Panels

Leviton CAT 6A 110-style patch panels offer TIA-568-C.2 performance up to 500 MHz to support 10GBASE-T networks. The panels have a physical design consistent with industry standard 110-style panels, including in-line configured IDCs and six-port housing modules. However, they add several exclusive design features:

- Pair Separation Tower design makes untwisting CAT 6A pairs easier
- Separated blocks simplify identifying first cable pair position
- Conductor retention feature holds conductors securely in place during termination
- Patent-pending triple-stage compensation design enhances permanent link and channel performance

PATCH PANELS | Flat Metal QuickPort® > UTP & Shielded

COPPER

patch panels

The QuickPort system, Leviton's exclusive set of mix and match panels, connectors, wallplates, and surface-mount boxes, allows you to create the perfect mix of voice, data, video and audio, all in a single panel.

TRADITIONAL FLAT PANELS

- All configurations available empty, connectors available on pages A9-A16
- 1RU 24-port and 2RU 48-port panels available kitted with black CAT 6A/6/5e connectors
- Silkscreened port numbers on panel front

HIGH-DENSITY FLAT PANELS

- 2RU 72-port panel available empty only
- 1RU 48-port panel features patent-pending, robust die-cast aluminum construction
- 1RU 48-port panel available empty or kitted with black CAT 6A/6/5e connectors

SHIELDED FLAT PANELS

- Shielding protects against EMI and RFI, and provides excellent alien crosstalk (AXT) suppression
- Provides data security for government, financial, and other sensitive networks
- Includes star washers and grounding lug
- Available in QuickPort 1RU 24-port and 2RU 48-port configurations
- Accepts all Leviton category-rated shielded connectors

AVAILABLE CABLE MGMT.:

PATCH PANELS | Angled 110-Style & QuickPort® > UTP & Shielded

COPPER

patch panels

Angled patch panels are ideal for freestanding 19" rack applications, offering easy termination and improved patch cord routing. Due to front depth requirements, angled panels are not recommended for cabinet installation.

UTP ANGLED 110-STYLE & QUICKPORT PANELS

- Conserves rack space by routing patch cords directly into vertical cable management
- Angled design facilitates proper bend radius and simplifies termination
- 110-style angled panels are available CAT 6/5e, and newly added CAT 6A
- 110-style angled panels include a snap-in plastic label holder and card stock labels
- QuickPort angled panels include white write-on blocks
- 1RU 48-Port QuickPort panel can be used with all QuickPort connectors including CAT 6A, 6, 5e, and fiber
- CAT 6A panels include magnified label holders for easy reading
- All QuickPort angled panels sold empty

SHIELDED ANGLED PANELS

- Provides excellent alien crosstalk (AXT) suppression
- Shielding protects against EMI and RFI
- Provides data security for government, financial, medical, gaming, and other sensitive networks
- Includes star washer and grounding lug
- Available in QuickPort 1RU 24-port and 2RU 48-port angled configurations
- Accepts all Leviton category-rated shielded connectors

RoHS All Leviton CAT 6A/6/5e Patch Panels are RoHS Compliant

SPOTLIGHT VertiGO Zero-U Patch Panels > Unparalleled Flexibility

Leviton's patented VertiGO Zero-U Patch Panels offer unprecedented versatility for a wide range of installations. In data centers where left or right side cabinet installation is ideal, VertiGO can share mounting hardware with servers or other existing equipment. Where traditional cabinet space is lacking, VertiGO can be mounted to a ladder tray, wire basket, directly to the wall, under a raised floor, or even onto modular furniture.

VertiGO addresses three major data center issues: density, cooling, and appearance. Mounting vertically along a back cabinet rail allows more terminations than would otherwise be possible. Cables can be routed along the cabinet outer edges to improve airflow. The low-profile design fully covers the connections, providing the clean look managers seek.

DATA GRADE PANELS

- 8P8C Data Grade Panel supports 10/100BASE-T applications
- Features 25-pair female Amphenol™ RJ-21X connectors for quick, easy termination
- Pre-configured in 24- and 48-port densities

VOICE GRADE PANELS

- 110-style or 25-pair configurations
- Unique label delineates 1-, 2-, 4-, or 25-pair termination options
- Pre-configured in 24- and 48-port densities

RHINOPRO® LABELING SOLUTIONS

Leviton recommends RhinoPRO labeling solutions for superior mechanical patch panel labeling. Printers are available in handheld and desktop versions; both include software with Leviton templates to create easy-to-read labels that perfectly fit our patch panels. For more information or to order, please visit rhinolabeling.com.

CROSS CONNECT

FEATURED PRODUCTS

CAT 6A Wiring Block **A48**

Dependable, flexible, and cost-effective, Leviton 110-style and 66-block cross connect products are ideal for telecommunications rooms and distribution frames.

110-style wiring blocks are available in CAT 6/5e and newly added CAT 6A, and can be mounted to the wall or plywood backboard. Rack-mount solutions are also available.

CAT 6A 110-STYLE WIRING BLOCKS

- Supports high-frequency data signals up to 500MHz
- Can be used as a consolidation point (CP) in a TIA-defined 90-meter permanent link
- Designed to mitigate alien crosstalk (AXT)
- Independently tested and verified by Intertek (ETL) to meet all TIA component, permanent link, and channel requirements
- Available in 64-pair wall-mount block

CAT 6 110-STYLE WIRING PRODUCTS

- Support voice, data, and security applications
- Complete selection of rack and wall-mount blocks, mounting frames, patch cords, and cable management
- Wall-mount wiring block kits available in 96-, 192-, and 288-pairs
- Rack-mount wiring block kits available in 1RU 96-pair, 2RU 192-pair, and 3RU 288-pair configurations
- 110-style patch cords in 110-110 and 110-T568A/B configurations
- Connector clips withstand 200 reterminations

SURFACE-MOUNT MINI PATCH PANELS	
[L] 25 6-position 2-Conductor [RJ-11]* FCC Spec Jacks, connected to a circuit board with one male 25-pair connector in surface-mount housing. Wired in standard T-R sequence (26-1, 27-2, 28-3, etc.)	41600-001
[M] 25 6-position 2-Conductor [RJ-11]* FCC Spec Jacks, connected to a circuit board with two bridged 25-pair connectors (one male and one female) wired in standard T-R sequence for series connection	41620-001
Mounting Magnets (20 per package)	49200-00M

*Numbers in brackets refer to industry product designation.

CORDS & TRUNKS

FEATURED PRODUCTS

CAT 6A Patch Cords **A55**

Copper Trunks **A57**

Trunk Configurator **A58**

Leviton patch cords are available in standard and SlimLine configurations for shielded and unshielded applications, and in category ratings from CAT 6A to CAT 5e. With flexible stranded wire for long-term channel integrity, Leviton patch cords provide the consistent transmission you need. For custom configurations and fast, simple installations, we also offer pre-terminated copper trunk cables. Each trunk cable is manufactured to your specifications, reducing installation time and maximizing flexibility.

COPPER

ords & trunks

SLIMLINE PATCH CORDS

Why choose Leviton SlimLine patch cords? Several reasons: the narrow plug profile reduces congestion in higher density applications, the integrated strain relief boot ensures long-term network performance, and the snagless design prevents tab breakage.

CAT 6A SlimLine cords add even more exclusive features. The cable construction provides excellent alien crosstalk suppression and EMI/RFI protection - the same cord is deployed for UTP and shielded installations. An industry-leading outside diameter of .240" further reduces congestion.

Leviton SlimLine patch cords are available in CAT 6A, 6, and 5e, in six standard lengths from 3 - 20 feet, and your choice of eight colors. Other lengths and colors are available by special order.

8 colors!

COPPER TRUNKS

Leviton copper trunks are part of our make-to-order (MTO) program, with an extensive selection of custom-configurable copper and fiber products to speed data center and other large, critical installations. By shifting much of the assembly work to the factory, field installation time is reduced by up to 80%.

With every copper trunk order you choose cable type; breakout and overall length; jack, plug, or open termination; plug alignment; cable and jack color; and sleeve type. Jack-terminated trunks feature the QuickPort® footprint for compatibility with all QuickPort panels. Included true plenum-rated braided sleeve with pulling eye protects terminations during shipment, ensures easy installation, and keeps trunk assembly organized.

Leviton's copper trunks are 100% factory tested and shipped with test results. Each assembly also receives an individual serial number with relative individual cable numbering. Pre-terminated cable assemblies are eligible for the Leviton Lifetime Product and System Performance Warranty without further testing after installation.

Customize trunks by phone or online through Leviton's exclusive configurator at leviton.com/configurator.

COPPER

CORDS & TRUNKS

All Leviton patch cords are components of a category-rated network infrastructure solution that also includes connectors, patch panels, and approved Leviton partner cabling. For optimum performance and full system warranty, use a Leviton Contractor Program Installer to install your Leviton components.

CAT 6A UTP & SHIELDED PATCH CORDS

- Component-rated for optimum channel performance
- Independently tested and verified by Intertek (ETL) to meet TIA component and channel requirements
- Provides exceptional alien crosstalk (AXT) suppression in CAT 6A channel
- Same cord for UTP or shielded installations
- Features narrow profile SlimLine plug for less congestion in higher density applications
- Strain relief boot ensures long-term network performance
- Snagless design prevents tab breakage
- Outside diameter of .240" is easier to manage
- 26-gauge stranded cable for maximum flexibility
- Leviton patch cord required for channel warranty

PRE-TERMINATED COPPER TRUNKS

- Custom configured in pre-engineered lengths with customer-specified connectors
- Fast and easy installation with reduced labor costs
- 100% factory tested, with test results included for each link
- CAT 6A trunks all utilize Leviton's component-rated connectors, which provide excellent performance in lengths as short as 10 feet
- UTP connectors utilize Leviton's patented Retention Force Technology (RFT) for consistent system reliability
- Plugs feature clear SlimLine design with snagless strain relief boot
- Terminated ends offered in staggered or even cut
- Customized breakout length from braided sleeve improves installation flexibility and appearance
- Each assembly receives an individualized serial number, and individual cables are numbered relative to that serial number (custom labeling available on request)
- Assemblies are eligible for the Leviton Lifetime Product and System Performance Warranty without further testing after installation (configurations with open termination option will require testing after field termination)

RECOMMENDED APPLICATIONS:

- Data Center Cabinets
- Telecommunications Racks
- Quick Network Deployment

SPOTLIGHT Pulling Eye

A pulling eye is included on terminated ends of all multi-cable assemblies. Made of braided mesh, the pulling eye completely covers the breakout length, transferring any pulling force from the eye to the braided mesh sleeve, and protecting the cable from undue stress during installation. The pulling eye also protects connectors during shipment, ensuring reliable operation out of the box.

UTP SECURITY

FEATURED PRODUCTS

New

Passive Video Transceivers **A61**

New

Video, Power, and Data Transceivers **A63**

New for 2010! Connect analog security cameras and recording equipment over the same UTP cabling used for voice and data networks with the Leviton suite of UTP security solutions. The suite includes connectivity equipment to support video transmission over a standardized structured cabling system, using local or centralized power. Choose from a wide selection of transceivers, receivers, and signal integrators with 1, 4, 8, or 16 channels.

TAKE A STEP TOWARD UNIVERSAL INFRASTRUCTURE

Connect your analog security cameras and recording equipment over UTP cabling with the Leviton suite of video security connectivity equipment.

The benefits are clear:

Significant Savings

Reduce network construction costs by as much as 30% by converging voice, data, and video onto a single cabling system. Save on installation as well. With a centrally powered system, a low voltage technician can complete the install; no local power at the camera is needed. Once the system is up and running, MAC (move, add, and change) expenses can be reduced by 25 - 40% due to increased system flexibility.

Simplified Installations

Support video signals for up to four cameras, or integrate video, power, and data signals for one camera, with just one lightweight UTP cable. Fewer - and smaller - cables reduce both congestion and cable management requirements in pathways and spaces. In addition, UTP cabling has a tighter bend radius than coaxial cable, making it easier to install in close quarters.

Streamlined Operations

Centralized power gives security systems the same protection as active equipment: power distribution units (PDUs) condition power, while an uninterruptible power supply (UPS) provides battery backup. In addition, in-house IT staff can handle security-related maintenance, streamlining facility management and upgrades.

Superior Lifespan

Standards-based cabling infrastructure is the scalable solution. It supports traffic growth from growing enterprises and bandwidth-hungry applications, as well as successive generations of equipment. Plus, UTP cabling supports both analog and IP cameras, providing an ideal migration path to IP-based systems.

COPPER
security

PASSIVE VIDEO TRANSCEIVER BALUNS

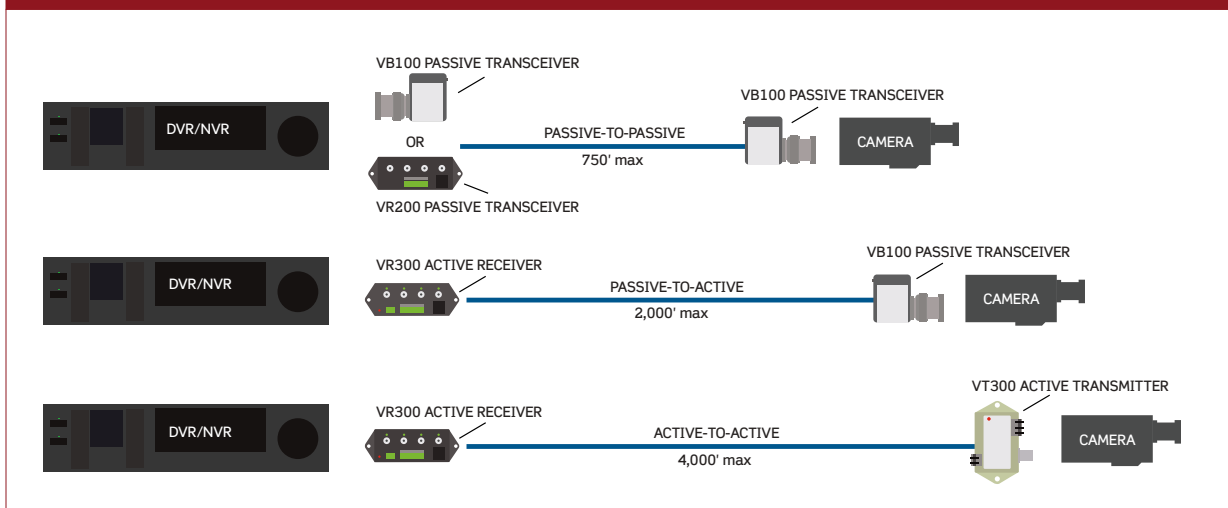

- IDC terminations for secure connections to solid-conductor UTP cable
- Transmit and receive video up to 750 feet (229 m)
- Transmit up to 2,000 feet (609 m) when combined with an active receiver
- Compact footprint for ease of installation
- VB100 model includes differential surge suppression to protect against damaging voltage spikes through cabling

PASSIVE VIDEO TRANSCEIVER HUB

- UTP connection via IDC termination block, screw terminal block, or RJ-45
- Both IDC and screw-terminal connector included with all models
- 8- and 16-channel models are standard 19" rack-mount
- Surge suppression included

ACTIVE VIDEO TRANSMITTER & RECEIVER

- UTP connection via IDC termination block, screw-terminal block, or RJ-45 (multi-channel products only)
- Automatic gain control for ease of installation
- Active receiver boosts passive transceiver signal to achieve distances of up to 2,000 feet (609 m)
- Pair an active receiver with an active transmitter for signal transmission up to 4,000 feet (1218 m)
- Surge suppression included with all active products
- Both IDC and screw-terminal connector included with all multi-channel models
- 8- and 16- channel models are standard 19" rack-mount

ZONE ENCLOSURES

FEATURED PRODUCTS

Raised-Floor Enclosures **A66**

Leviton's zone cabling enclosures are the perfect solution for adding flexibility within an open-office architecture or data center environment. Choose from ceiling-mount or under-floor versions. Leviton also offers a full line of access point enclosures for wireless networks, found in Section D. Fiber optic enclosures are listed in Section B.

ZONE ENCLOSURES | Active & Passive Enclosures

ZONE ENCLOSURES

- Provide flexible consolidation point in ceiling or floor
- Simplify moves, adds, and changes
- Plenum-rated with included fire-rated foam sealing kits
- Significant reduction in cable pathway loading
- Use as a telecom enclosure (TE) for cabling flexibility

CEILING ENCLOSURES

- Install flush with drop ceiling
- Fully hinged drop-down doors support installed equipment and open to face technician
- Active and passive styles available

2' x 2' PASSIVE RAISED-FLOOR ENCLOSURES

- Fit in air handling space under 8" raised floors
- House two 4RU (8RU total) racks for standard 19" components
- Rotating patch panel mounting provides easy access to rear of panels

CABLE MANAGEMENT

FEATURED PRODUCTS

New 8" High-Capacity
Versi-Duct® **A69**

Genuine VELCRO®
Brand Fasteners **A75**

Leviton's wide offering of cable management solutions for copper installation includes Versi-Duct® vertical and horizontal cable managers, rear cable managers, and VELCRO® Brand fasteners. Each solution provides effective support and organization of cables and patch cords, improving overall network management and cable routing. Leviton cable management products are easy to install, adaptable to a variety of applications, and facilitate efficient moves, adds, and changes.

VERSI-DUCT CABLE MANAGEMENT SYSTEM

Leviton's unique Versi-Duct system is a versatile cable management solution for copper and fiber installations. The innovative system fits on any standard equipment rack, and accessories enable a wide range of cable management configurations.

- Injection molding eliminates sharp edges and protects cable integrity
- Extremely durable ABS plastic channels withstand years of use in demanding environments
- PVC plastic is an economical and sturdy material for channel covers
- 40" and 80" channels are available in front only or front and rear configurations
- All channels include cable-concealing cover
- Large finger passthrough space aligns with rack units
- Integrated dual-hinge for easy accessibility

FINGER SPACING

Large finger spacing creates flexibility in patch cord routing.

OPEN CHANNELS

Open channels allow management control and accessibility while protecting cable.

EASY PATCHING

Vertical cable management enables smooth transition from horizontal panels and equipment.

INJECTION MOLDING

Injection molded channels eliminate sharp edges that could damage cables.

VERSI-DUCT 8" CHANNEL CABLE MANAGEMENT

- Ideal for today's large-scale deployments and CAT 6A installations with typical larger diameter cable
- 80" channel ships in two 40" pieces for easier handling and installation
- Channels available with standard or new designer cover
- Channels include cover, slack loop organizers, and cable retainers and mounting brackets
- Included cover features unique integrated dual-hinge for easy accessibility
- Same channels can be side or center-mounted for better space utilization

8" VERSI-DUCT CAPACITY CHART

Use the chart below to determine maximum recommended cable capacity for 8" Versi-Duct managers, based on average cable outside diameter. To ensure proper bend radius and space for future additions, do not fill to capacity at initial installation.

Feature	Channel Depth (WxD)	Usable Area (In ²)	CAT 6A Capacity (.330" Cable)	CAT 6 Capacity (.230" Cable)	CAT 5e Capacity (.185" Cable)
8" Channel Size	8" x 8"	56	186	384	596
Finger Spacing	5.5" x 1"	5.5	24	60	114
Large Passthrough	4.8" x 2.6"	12.7	72	120	258
Small Passthrough	2.6" x 2.6"	6.8	36	72	138

SPOTLIGHT Angled & Recessed Angled Panel Cable Management

Leviton offers several alternatives to traditional flat panels, including our popular angled and recessed-angled styles. Each configuration addresses specific installation requirements, such as angled for improved patch cord routing in high-density applications and recessed-angled for minimal depth in front of the panel. Available cable management includes ducting, bars and other organizers, blank panels, and a wide variety of VELCRO® Brand fasteners. Transitional covers that fill the space between panels and active equipment create a clean aesthetic and provide thermal management.

COPPER

cab

CABLE MANAGEMENT RINGS

- Tie Bracket allows rings to be center-mounted
- Vertical Transition Rings are used for vertical and horizontal cable management and are compatible with flat and angled panels
- Vertical manager rings are an open ring solution that can be installed in tight spaces and smaller deployments

HINGED WALL-MOUNT BRACKETS

- Designed for installations where space is constrained and racks are not used
- 6" deep brackets allow for proper cable management
- 2RU, 3RU, and 4RU sizes

FRONT HINGED BRACKET

- Simplifies process of terminating cables to rear of patch panels when access is limited
- Easy-access quick release latches drop to 90° and 120° positions
- Rack- or wall-mountable

VELCRO® BRAND TIE WRAPS

- Available in 5", 8", and 12" lengths (all 0.5" width)
- Slot helps secure fastening without over-tightening
- Maroon products UL listed for use in plenum or air handling spaces per National Electric Code (NEC) Section 300
- All wraps come 25 units per roll

VELCRO® BRAND WRAPS - BULK ROLLS

- Available in 15', 75', and 600' bulk rolls (0.5" width)
- Maroon products UL listed for use in plenum or air handling spaces per NEC Section 300
- Cut to desired length

VELCRO® BRAND COMPRESSION STRAPS

- Available in 15" lengths, (all 0.5" width)
- Adjustable to support a variety of loads
- Easy feedthrough slot helps secure fastening without over-tightening
- Strap locked area equals 6 square inches
- Holds up to 320 CAT 5e, 200 CAT 6, or 100 CAT 6A cables

VELCRO® BRAND WRAPS - SOFTCINCH LITE ROLLS

- Thinner material for smaller bundles
- Tear by hand for quick application
- Available in 75' roll, (all 0.5" width)

SPOTLIGHT Protect Cables with Genuine VELCRO® Brand Fasteners

Use Leviton VELCRO® Brand fasteners to secure all cable bundles. Our genuine VELCRO® Brand products won't crush or damage cables like tie wraps can, and are reusable for moves, adds, and changes. Plus, with our extensive range of fastener styles, colors, and sizes, Leviton has the perfect VELCRO® Brand cable management solution for your unique needs.

COPPER TOOLS

FEATURED PRODUCTS

New Palm Termination Tool **A78**

Wire Punchdown Termination Tool **A78**

Leviton has everything you need to terminate and test our copper solutions. The new ergonomic Palm Termination Tool, designed by and for installers, offers comfort-grip or rack-mounted positioning for termination, a sturdy connector holder, and a wire-supporting retainer. The Wire Punchdown Tool enables one-step punchdown of 110-style or 66 connecting block IDCs with a single push on the handle. Specialized termination tools, test equipment, crimping tools, and other accessories complete the collection.

COPPER
tools

PALM TERMINATION TOOL

- Overmolded ergonomic soft grip
- Easy-to-see wiring labels
- Connector holders provide stability for punchdown
- Incorporated retainer supports cable during termination
- Integrated holes allow rack-mounting of the Palm Tool for patch panel terminations
- Compatible with all Leviton CAT 6A/6/5e and A/V connectors

MULTI-PAIR TERMINATION TOOL

- Designed for 110-style wiring products
- High-impact, spring-loaded handle for one-punch termination of multiple pairs
- “Blade-in” and “blade-out” options
- Includes 4-pair, CAT 6 head
- CAT 5e and 6 heads available individually

WIRE PUNCHDOWN TERMINATION TOOL

- Punches and trims each wire with just a single push of the handle
- Adjustable impact setting for minimal physical effort
- Spare blade storage in handle chamber
- Available in 110 IDC and 66 IDC
- Terminate 22-, 24-, or 26-gauge wire

CUTTING TOOLS

- Klein Tools® Electrician's Scissors are excellent for cutting and stripping copper cable as well as trimming center splines and rip cords
- Klein Tools Flush Cutter neatly trims individual cable wires flush to connector body to prevent shorts in metal housings (recommended for shielded connectors)

TONE TEST SET

- Low voltage tester for continuity, shorts, and opens
- Talk battery for a communications line on a vacant pair
- Identifies Tip and Ring polarity, and line condition for clear line with dial tone, busy line, and ringing line
- Generates continuous or warble tone to trace pairs and locate broken pairs/cables in walls - use with Inductive Speaker Probe (below)

INDUCTIVE SPEAKER PROBE

- Detects audible frequency tones for accurate tracing and identification of wires, cables, and metallic circuits
- Use with the Tone Test Set (above) to trace and isolate pairs

LEATHER HOLSTERS

- Fits on most standard belts
- Two styles, for Tone Test Set and Inductive Speaker Probe

CRAFTSPERSON'S HANDSET

- For basic line testing and essential on-site temporary communications
- Line-powered to provide either DTMF (Touch Tone) or dial pulse output
- Features all standard Butt Set line tests

MODULAR PLUG BREAK-OUT ADAPTER

- For testing any 6- or 8-position modular jacks
- Works with the Tone Test Set or Craftsperson's Handset

COAXIAL CONNECTOR TOOLS

- Crimp coax onto RG-59 or RG-6 cables
- Rugged metal construction with cushioned handles

MASTER COMPRESSION TOOL

- Terminates all Leviton coaxial compression connectors, including compression RCA and F-connectors
- Radial-style crimp compresses uniformly around connector body
- Creates high-integrity bond that does not relax over time

UTP STRIPPING TOOL

- Strip unshielded twisted pair (UTP) cable

66-CLIP TERMINATION TOOL & ACCESSORIES

- Punches down 20- to 26-gauge unstripped wire in devices using 66-clip terminals
- Replaceable blades reverse for termination with or without cutting
- Replacement stem (66-BT02)
- Replacement blade (66-BT01) - reversible for termination with or without cutting
