

# Halogen

Halogen lamps are designed to provide a crisp white light, a long life and constant lumen maintenance.

The use of halogen gas enables the filament to burn slower and to operate at a higher temperature, allowing for a whiter and brighter light output. Halogen also offers for a longer life and greater lumens per watt, making halogen lamps more efficient than regular incandescent lamps.

The crisp white light produced by halogen lamps reflects nicely on crystal by making it sparkle and enhances the beauty of crystal chandeliers.

Halogen lamps are dimmable and can be used in the most compact and stylish fixtures.

Many STANDARD halogen lamps are offered with a coating that filters UV rays and they can be identified by the UV STOP icon.
