WSLMS24-CCT
High Power Linear Strip Light

|	
NAME:	
TYPE:	
DATE:	
NOTES:	

SPECIFICATIONS

WIRING:	Hardwire only. Installs easily to ceiling or wall. It may also be installed over a junction box using a canopy plate for an octagonal junction box. (NDR model: CVR500) Manufactured as a two-part unit; easily removed front panel and a wire back housing to allow for ease of installation.	**COLOR TEMPERATURE:**	3K - 35K -4K selectable
HOUSING DETAILS:	The housing is formed steel with multiple ½" knockout locations for ease of installation. The motion sensor is a PIR sensor with a detection range of 13'(4m) to 19'(6m) and a time delay of 3 minutes. There are 4 functions of the PIR sensor that are controlled directly on the driver in the housing. 4 functions are: -ON: Default setting, light will turn off after 3 minutes of no movement -50%: Light will dim to 50% after 3 minutes of no movement -30%: Light will dim to 25% after 3 minutes of no movement -OFF: PIR motion sensor turned off, light ON/OFF controlled by light switch	**CRI:**	80+
		LUMEN OUTPUT:	1800 / 2400 / 3000 lumens
		DIMMABLE:	Yes
		WATTS:	15W / 20W / 26W selectable
		LED LIFE:	50,000 hours
OPTICS:	Offered with an acrylic frosted diffuser lens and LED strip technology to distribute light and optimize delivered high level of lumens.	**WARRANTY:**	5 years
ELECTRICAL:	Easily connected to a 120-277V power supply via provided UL recognized driver. 0-10V dimmable DAMP LOCATIONS rated Certifications: This product is ETL and DLC 5.1 listed in USA and Canada.	**VOLTAGE:**	120-277V
		HEIGHT:	2.44" (6.2 cm)
LENS:	The Python High Power Strip light has a frosted diffuser providing a uniform and widespread illumination.	**LENGTH:**	22.8" (58 cm)
		WIDTH:	2.71" (6.9 cm)
		INTEGRATED MOTION SENSOR:	Yes
		MOTION SENSOR DETECTION RANGE:	13' - 19' (4m - 9m)

APPLICATIONS

The high power strip light equipped with the PIR motion sensor is ideal for many applications including corridors, stairwells, storage rooms, garages, laundry rooms and many other applications alike.
