Notes		

#### Features

##### Construction

The vapour barrier is made from a UL recognized transparent PVC membrane rated to 90°C.

##### Mounting

Vapour barrier includes a flat flange that allows for secure fit to joists.

##### Application

Resists passage of water vapour from a region of high vapour pressure to low pressure. Restricts the rate and volume of water vapour diffusion through the walls.

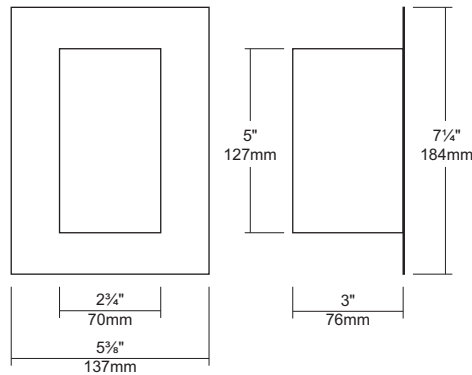

##### Compatibility

This vapour barrier is compatible with one-gang 2" x 3" electrical boxes up to 3" deep.

#### Description

The LL-VB1 is a 1-gang vapour barrier with flat flange used for 1-gang electrical boxes. This vapour barrier is used to restrict the rate and volume of water vapour diffusion through the walls.
