# GUARDIAN™ BENDER

The Guardian™ Bender by IDEAL® brings ease and consistency to conduit bending whether you are a seasoned professional or just getting started. With upgrades across the entire tool, the Guardian Bender will quickly become your go-to bender to get the job done right and done quickly.

Built with a powder-coated, ductile iron head for exceptional durability, its rugged construction withstands a lifetime of heavy use. The preset angle stopper takes the variability out of bending. Each angle location is machined in for accuracy, providing a firm stopping point when completing bends. Users of any skill level can create the perfect bend, every time.

A textured blue handle resists corrosion, provides additional grip, and enhances visibility with no threads or flare. The handle is fixed to the head eliminating the need to re-tighten. With the flare end removed, each handle is sized for the conduit you are bending, and provides the ability to use it as a straight edge to measure your next bend.

## Angle Stopper

Push-button, spring-loaded lock to set position for 10°, 22.5°, 30°, 45°, 60° and 90° bends.

## Head Upgrades:

- Quick adjustment angle stopper
- Non-removable with onboard storage location
- Recessed marking for increased legibility
- In air bend angle indicators on back of head
- Bend correction hole incorporated into head

## Handle Upgrades:

- Straight handle - for use as a straight edge
- Textured handle for increased grip
- Handle diameter sized to fit conduit being bent
- BILT® link incorporated onto the handle

Sight for aligning offset bends  
Bend correction hole

30°, 45° and 60° embossed saddle bend marks

Textured, straight handle with fixed attachment to head
