Smart Outdoor Plug-In Switch,
Matter-Enabled with Wi-Fi

before you start

Review this guide in its entirety. Consult an electrician with any questions or if you are unsure of your abilities.

Caution: To reduce the risk of injury and/or overheating and damage to other equipment:

- Connect the smart outdoor plug-in switch to a 120 VAC, 60 Hz power source ONLY.
- To reduce the risk of electric shock, this equipment has a grounding type plug that has a third (grounding) pin. This plug will only fit into a grounding type outlet. If the plug does not fit into the outlet, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.
- Before installation, ensure there is sufficient Wi-Fi signal strength of at least two bars. Using a smartphone or tablet on the same Wi-Fi network, go to the device intended location and check signal. If signal is weak, you may need a Wi-Fi Extender.

specifications

Load	Rating
Resistive	120 VAC, 60 Hz, 15 A
Incandescent/halogen	1000 W
Motor	½ HP
LED	5A

Legrand reserves the right to change specifications without notice.

installation & setup

1 | plug in the smart plug-in outdoor switch

1. Plug unit into 120 VAC power socket protected by fuse or circuit breaker
2. With no load connected the unit will automatically become energized and the indicator will blink green.
3. Press "On/Off" button.
4. Press and release "On/Off" button for use.
5. Connect the desired load equipment to cord receptacle and operate equipment normally.

NOTE:

Both outlets are controlled together.

2 | set up your Matter-compatible plug

This product is Matter-certified and designed to be used with a Matter-compliant smart home platform (Amazon Alexa, Google Home, Apple Home, Samsung SmartThings, etc.)

1. A Matter-compliant controller (Home Hub / Admin) and smart home app of the same platform is required for setup.
2. Turn on Bluetooth and connect to a 2.4 GHz Wi-Fi network on your smartphone (5 GHz networks not supported)
3. Open your Matter-complaint smart home app and follow the in-app instructions for adding a Matter device.

TROUBLESHOOTING:

If the outlet is not appearing during setup or fails during the setup process, confirm that the device is powered and perform the factory reset procedure. Once the device has been reset, restart the setup process in your smart home app.

MULTIPLE PLATFORMS:

If wanting to provide access across multiple smart home platforms, the initial QR code on the device will only work with the first app that was used. To setup in subsequent apps and systems, a new Matter code will need to be generated in the original app the device was setup with.

QUICK SETUP TIP:

For an even faster setup process, open the Camera app on your phone and scan the QR code on the back of the device. This will set the plug device up in your preferred Matter-compatible smart home platform.

getting to know your switch

Item	Name	Description
1	LED Indicator Light	<ul style="list-style-type: none">Indicates the current state of device. See LED Indicator Light Explanations for detail.
2	On/Off Button	<ul style="list-style-type: none">Turns the device either on or off.To return the device to factory default, press and hold the button for 10 seconds.

LED LOCATOR LIGHT EXPLANATIONS

LED Color	State of Light	Explanation
	Blinking Green	Factory default; ready to connect to your network.
	Solid Green	Device is connected to network and is on.
	Green Blinking Red	Return device to factory settings

regulatory information

FCC NOTICE

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesirable operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the transmitter's radiating structure(s) and the body of the user or nearby persons.

Note: Any changes or modifications to this device that are not expressly approved by the manufacturer will void the warranty and the user's authority to operate the equipment.

FCC ID: 2AC7Z-ESPC3MINI1

IC NOTICE

This device complies with Industry Canada license-exempt RSS standards. Operation is subject to the following two conditions: (1) this device may not cause interference; and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

RF EXPOSURE STATEMENT

This equipment meets the SAR evaluation limits given in RSS-102 Issue 5 requirements at the minimum separation distance of 15 mm to the human body.

Note: Any changes or modifications to this device that are not expressly approved by the manufacturer, will void the warranty and the user's authority to operate the equipment.

IC ID: 21098-ESPC3MINI1
