

Poke-E

Perforated strip for holding your wire in place before drywall

TAME YOUR CABLES

Dreamed up by an electrician who was tired of his wires being buried in the walls. The Poke-E is a perforated strip that solves that issue by holding your cables in the exact place you intended them to. The Poke-E is installed during the rough in stage of construction in both residential and commercial applications.

Install in 3 easy steps: Nail, Cut and Poke

The Poke-E is only intended for use with Class 2 wiring only.
