

A revolutionary receptacle device
that redefines efficiency.

PowerHold™

Maximize Your Minutes

#LegrandImprovingLives

Your Reputation Runs on Efficiency.

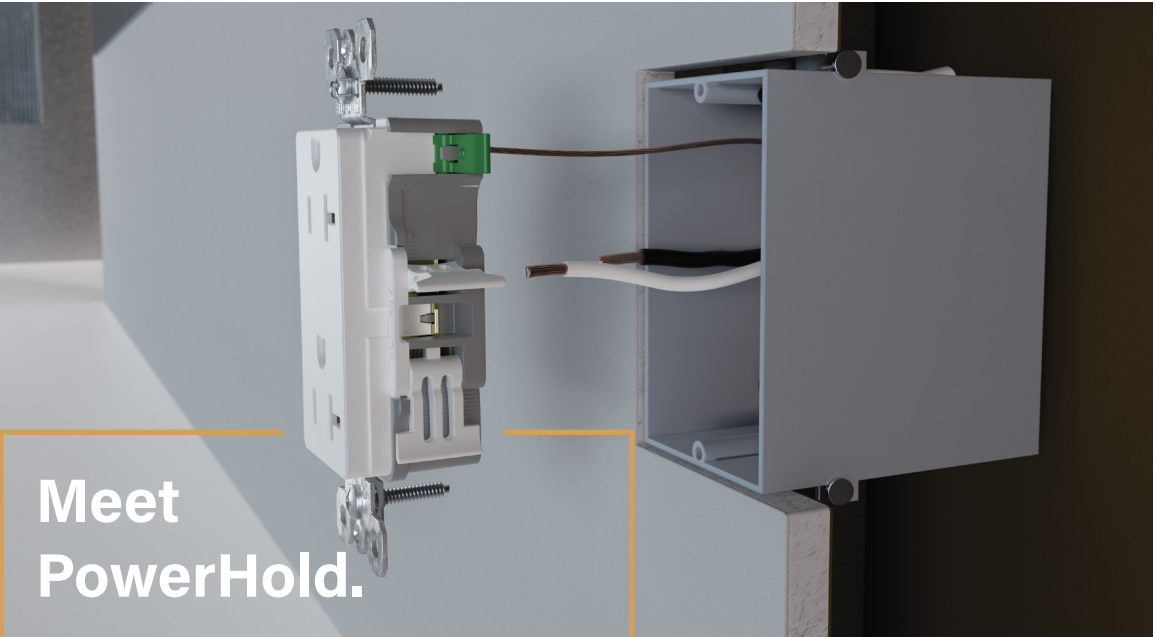

When time is money, you know there's not a second to waste. For you, efficiency isn't just a goal or a tool or even a technology – it's a reputation.

Efficiency is built into your every decision, every action and every project outcome.

It's what powers you to crush hard deadlines and finish under budget without compromising quality.

It's how you reduce callbacks and reinstalls because you get it right the first time – every time.

And it's what sets you apart from the competition, earning you repeat business and making you the one to beat on every bid.

Meet PowerHold.

At Legrand, we get it – you're a contractor who knows the value of every minute on the job.

That's why we developed a new solution to help you maximize your productivity and minimize wasted effort.

PowerHold is a receptacle that reduces errors and enhances profitability while delivering faster, more reliable results.

Simply insert your wires, snap the levers and in less than a minute you're done.

With PowerHold, you're not just quickly installing a receptacle – you're building the reputation for efficiency that sets you apart. Your clients rely on you to deliver excellence without delay, and now you have the solution to make that happen.

FEATURES & BENEFITS

Fast Terminations.
With terminations in 10 seconds or less, PowerHold significantly boosts your productivity, enabling you to take on more projects and complete them ahead of schedule.

Easy Wiring.
PowerHold makes the wiring process easier and safer with no exposed live components. Easily-accessed break-off tab on both hot and neutral side for fast and easy split-circuit wiring.

Superior Wire Retention.
With a retention force greater than 30 lbs, PowerHold's custom wire retainer geometry ensures consistent, reliable connections that are twice as strong as the competition.

Sleek, Space-Saving Design.
Shallower than competitors, PowerHold offers a streamlined design without compromising on performance.

Error-Free Installation.
Color-coded levers (white/neutral, black/hot, green/ground) reduce the risk of miswiring, while an audible snap confirms the lever is securely closed.

Tamper-Resistant.
Dual mechanical shutter system to help prevent insertion of foreign objects.

Built for Tomorrow.
Dependable connections that stay secure during use, yet are easily changeable for future updates or renovations.

Perfect for a Variety of Applications.
Ideal for light commercial, hospitality, commercial office, multi-dwelling units, prefabrication and residential applications.

POWERHOLD VS. CONVENTIONAL

	PowerHold Terminates in 10 seconds or less
	Conventional About a minute

LET'S GET STARTED

You have a reputation to build and defend – and Legrand is the partner you need to make that happen. So go ahead, take the next step and raise your standards on what it means to be efficient. Your reputation depends on it.
