

PanZone® Wall Mount Cabinet

SPECIFICATIONS

Hinged wall mount cabinet shall be constructed from steel and capable of managing 9, 12, 18, or 26 rack units of active and passive networking equipment. The cabinet shall have hinged doors on front and back for complete access to networking equipment. The cabinet shall have removable and locking side panels. Cabinet shall allow use of standard length patch cords and have capabilities for managing all patch cord slack without blocking ventilation openings or vertical pathways. Cabinet shall be engineered to allow proper climate control for use with various networking equipment including Power over Ethernet (PoE) switches and Uninterrupted Power Supplies (UPS).

TECHNICAL INFORMATION

Attributes:	Part Number	No. of Rack Units	Height in. (mm)	Width in. (mm)	Load Rating lbs.*
	PZWMC9W	9	18.5 (471)	25.0 (635)	175
	PZWMC12^	12	23.8 (605)	25.0 (635)	250
	PZWMC1230^	12	23.8 (605)	25.0 (635)	250
	PZWMC18^	18	34.0 (864)	25.0 (635)	300
	PZWMC1830^	18	34.0 (864)	25.0 (635)	300
	PZWMC26^	26	48.2 (1224)	25.0 (635)	350
	PZWMC2630^	26	48.2 (1224)	25.0 (635)	350
Standards:	UL 2416, NEMA 1, IP20 Accepts 19" EIA rack mount panels and equipment				
Packaging:	Cabinet and keys, locks, two adjustable #12-24 threaded rails, removable cover panel for vent on top of cabinet, assembly hardware and rear cable routing accessory kit				

*Tested to 2x the working load rating

KEY FEATURES AND BENEFITS

Structurally engineered design:	Allows cabinet to swing freely for easy operation even under maximum load capacity
Horizontal slack manager (available):	Improves cable routing by enabling front accessible moves, adds, and changes; increases airflow through the cabinet because patch cords are no longer in the vertical channel blocking side ventilation
Thermal management system:	Optimizes airflow for improved heat dissipation from various switches and power supplies
Fan kits (available):	Provides additional ventilation for multiple switches or PoE enabled devices; use in cabinets with a windowed door
Rack spaces identification:	Allows for quick and easy location of rack spaces speeding installation of horizontal rack mount products
Grounding kit (available):	Complies with TIA/EIA grounding and bonding specifications

PanZone® Wall Mount Cabinet

APPLICATIONS

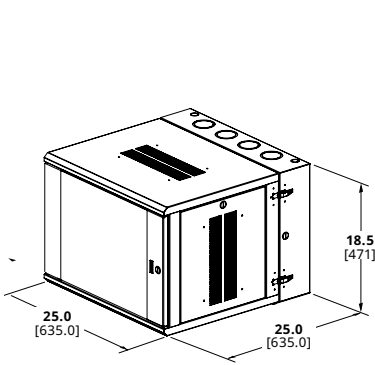

The PanZone Wall Mount Cabinet is a zone cabling solution for connecting active and passive equipment in a low-profile space. This cabinet allows easy deployment in applications where a Telecommunications Room might not be available, or where space is limited. The wall mounted cabinet provides security for equipment with keyed entry and has a dual hinged design to access equipment from front or rear of the cabinet. The cabinet has up to 26.8" of usable equipment depth and has removable side panels for ease of front to back cable routing. The optional bend radius posts provide clean cable management to the left or right of the EIA rails and provide relief for cables. In addition, the optional horizontal slack manager can be installed to manage patch cords routing from patch panel to the switch, which is especially useful for high density applications. Optional rear equipment rails provide additional support for network equipment, providing versatility for greater range of applications.
